

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF THE CENSUS,
Washington, D. C., July 11, 1904.

SIR:

I have the honor to transmit herewith, in bulletin form, a report on the employees in the Executive Civil Service of the United States. This report has been prepared in the Bureau of the Census under the supervision of Mr. William M. Steuart, chief statistician.

The statistics are compiled from reports made in compliance with the Executive order of March 31, 1903, by which "the heads of the Executive Departments and independent offices are directed to furnish to the Secretary of the Interior, for the preparation of the Official Register, under the act approved January 12, 1895, the date of the appointment of each officer and employee and his age and length of service under the United States, and a statement whether the position occupied by him is subject to appointment by the President, or is excepted, competitive, unclassified, temporary, or subject to contract." The work was done in compliance with the following order issued by your predecessor on October 8, 1903:

You are hereby authorized and instructed, at the instance of the Civil Service Commission, to undertake the compilation of the statistics of the classified service of the United States, collected in accordance with the Executive order approved March 31, 1903, these statistics to be published in appropriate form as a bulletin of the Bureau of the Census.

Very respectfully,

(Signed)

GEORGE B. CORTELYOU,
Secretary.

The DIRECTOR OF THE CENSUS.

The reports of the several Executive Departments were edited under the supervision of the Civil Service Commission. This bulletin is confined to a presentation of the statistics therein contained, with brief comment upon some of the results which appear to possess special significance. In compiling the statistics, the wishes of the Commission have been followed, the Bureau of the Census assuming responsibility only for the work of computing the percentages and making the tabulations.

As this is the first attempt to classify and tabulate facts of this character, some inconsistencies may appear upon a careful analysis of the figures for the different departments, bureaus, and offices. Accurate information concerning the personnel of the Executive Civil Service can be obtained only by compilations of this character made at stated periods. The Official Register is published biennially, and, as a considerable proportion of the information collected for it can be utilized for statistical purposes, I recommend that the Bureau of the Census be authorized to prepare bulletins relating to this subject at stated periods of either two, four, or six years; the inquiries to be made in connection with the preparation of the Official Register.

Very respectfully,

Director.

Hon. VICTOR H. METCALF,
Secretary of Commerce and Labor.

THE EXECUTIVE CIVIL SERVICE OF THE UNITED STATES.

This bulletin presents the statistics for the persons in the employ of the Executive Civil Service on July 1, 1903, as compiled from the reports made by the heads of the Executive Departments. For the purpose of this report the Executive Civil Service is construed to comprise all persons in the employ of the executive branches of the Federal Government, except enlisted men in military and naval branches. The reports from which the statistics were compiled show the following facts

for each employee: Sex, nativity, age, character of appointment, state and Congressional district from whence appointed, department and bureau in which employed, period of service, salary, character of work, and place where employed.

There were 150,383 employees included in the reports, and the following table summarizes the results so as to show totals for the principal features of the inquiry:

TABLE 1.—SUMMARY: EMPLOYEES IN THE DISTRICT OF COLUMBIA AND ELSEWHERE CLASSIFIED BY SEX, NATIVITY, CHARACTER OF APPOINTMENT, CHARACTER OF WORK, AGE, PERIOD OF SERVICE, AND SALARY.

40 to 49 years	30,394	5,338	25,056	Salary not reported	188	1	187

¹ Exclusive of the 1,050 Presidential appointees reported.

² Substitute rural free delivery carriers.

By comparing the reports of the Executive Departments with the Official Register for 1903, it appears that 120,786 employees were not reported in the returns from which this tabulation was made, and the following table shows the number of such employees in each branch of the service employed in the District of Columbia and elsewhere:

TABLE 2.—Employees in the District of Columbia and elsewhere reported in the Official Register for 1903, not included in this bulletin.

DEPARTMENT OR INDEPENDENT OFFICE.	Total.	In the District of Columbia.	Elsewhere.
Total	120,786	135	120,651
White House	39	39	
Department of State ¹	21		21
Treasury Department	413	15	398
War Department	13,914	1	13,913
Department of Justice	70	35	35
Post Office Department	85,093		85,093
Navy Department	18,449	11	18,438
Department of the Interior	2,589	17	2,572
Department of Commerce and Labor	194	16	178
Smithsonian Institution	4	1	3

¹ The number given here does not include ambassadors, consuls, etc.

The combination of the totals for Tables 1 and 2 gives 271,169 as the number of persons employed in the Executive Civil Service. Of the 120,786 employees omitted from the reports all but 17,710 were exempt from examination under the civil service rules and held positions for which the term of service, pay, regulations, and character of work differed in many respects from those of the positions included in the branches of the service covered by these statistics, so that their inclusion would tend to destroy the comparability of the figures. The returns are practically complete for the District of Columbia, as only 135 employees were omitted from the reports.

They include 74,196 postmasters, 10,855 employees at nonfree delivery post offices, and 18,140 employees at navy yards and stations who were appointed under navy yard regulations. The remaining 17,595 were distributed through the smaller bureaus and branches of the service.

The statistics for each of the items shown in Table 1, except nativity, are presented in detail and discussed

under the respective titles. The following table shows the number of employees in each of the departments and independent offices, classified by sex, nativity, char-

acter of appointment (classified or unclassified), and place where employed:

TABLE 3.—EMPLOYEES CLASSIFIED BY SEX, NATIVITY, CHARACTER OF APPOINTMENT, AND PLACE OF EMPLOYMENT, IN EACH DEPARTMENT AND INDEPENDENT OFFICE.

Of the 150,383 persons for whom information was reported, 89,747, or 59.7 per cent, were in the Post Office Department, and the next largest number, 23,053, or 15.3 per cent, was reported for the Treasury Department. These two departments gave employment to three-fourths of the Executive Civil Service, the number employed in the remaining branches of the service, with the exception of the War Department, for which 10,799, or 7.2 per cent were reported, being comparatively small.

The branches of the Executive Civil Service have been grouped so as to preserve the distinction between those employed in the District of Columbia and elsewhere. Certain local offices which are actually in the District of Columbia have been treated as located elsewhere by reason of the fact that their location at the seat of government is incidental rather than necessary. For example, the mail bag and mail lock repair shops are treated as being elsewhere than in the District of Columbia because their location in the District is no more necessary than would be the location of any other branch of the postal service. This distinction grew out of the construction of the statutes relating to the apportionment of appointments in the departments or independent offices at Washington among the several states and territories according to population, and the distinction is preserved here with the idea that in future legislation the employees in the District of Columbia and those elsewhere will be considered separately.

Of the 150,383 employees reported, 25,675, or 17.1 per cent, were considered as in the District of Columbia, while 124,708, or 82.9 per cent, were employed elsewhere. Of the 13 offices named in Table 3, there were 6 which reported that all of their employees were considered as located in the District of Columbia. The Treasury Department reported the greatest number,

6,003, as located there, while the greatest number, 88,171, employed elsewhere was reported for the Post Office Department.

The following synopsis shows separately the branches of the service included in each department, bureau, and independent office, whether it was considered as in the District of Columbia or elsewhere, and the actual location of the employees, together with the principal branches for which the employees were not reported:

WHITE HOUSE.

Employees not included in this report. (See Table 2.)

DEPARTMENT OF STATE.

It is considered as in the District of Columbia. Employees reported include only those at the department proper. Reports were not received for the diplomatic, consular, and other officers in foreign countries, the Isthmian Canal Commission, the United States and Mexican Water Boundary Commission, the Reciprocity Commission, the Dispatch Agents, the International Prison Commission, the Louisiana Purchase Exposition Commission, the Alaskan Boundary Commission, and the Pan-American Railway Commission. Of the 21 employees shown in Table 2, there were 5 employed by the United States and Mexican Water Boundary Commission, 3 as dispatch agents, 12 by the Louisiana Purchase Exposition Commission, and 1 by the Pan-American Railway Commission.

TREASURY DEPARTMENT.

The department proper.—Is considered as located in the District of Columbia, although some of the employees were employed at the paper mills in Pittsfield, Mass., and others were special agents, inspectors, and employees in the divisions of the Secretary's office

stationed at various places in the United States and foreign countries. The department proper includes all employees in the following bureaus and offices:

Office of the Secretary.
Divisions of the Secretary's office.
Secret Service division.
Office of Comptroller of the Treasury.
Office of Comptroller of the Currency.
Office of Chief Clerk and Superintendent.
Office of the Auditor for the Treasury Department.
Office of the Auditor for the War Department.
Office of the Auditor for the Interior Department.
Office of the Auditor for the Navy Department.
Office of the Auditor for the State and other Departments.
Office of the Auditor for the Post Office Department.
Office of the Treasurer of the United States.
Office of the Register of the Treasury.
Office of the Commissioner of Internal Revenue.
Office of the Supervising Architect.
Bureau of the Mint.
Office of the Supervising Surgeon-General, Marine Hospital service.
Office of the Life Saving service.

Bureau of Engraving and Printing.—Is considered as in the District of Columbia, and all its employees were so located.

Supervising Architect at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 architect, 1 foreman, 1 draftsman, 1 accountant, 1 laborer, 1 superintendent of construction, and 1 inspector of public buildings.

Custodian service.—This includes employees in public buildings, and is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Mint and Assay service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Customs service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Revenue Cutter service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 captain employed as engineer in chief, and a few chief and assistant engineers.

Internal Revenue service.—Is considered as elsewhere than in the District of Columbia, and the employees reported were so located, with the exception of 4 deputy collectors.

Subtreasuries.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Public Health and Marine Hospital service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 6 assistant surgeons-general, 2 passed as-

sistant surgeons, 3 assistant surgeons, 1 acting assistant surgeon, 1 pharmacist, second class, 1 pharmacist, third class, and 9 attendants in the Hygienic Laboratory.

Life Saving service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Of the 413 employees shown for the Treasury Department in Table 2, 3 were in the Office of the Comptroller of the Treasury, 80 were national bank examiners, 35 were national bank receivers, 60 were attorneys for insolvent national banks, 61 were national bank employees, 9 were in the office of the auditors for the various departments, 42 were in the Office of the Supervising Architect, 65 were in the Mint and Assay offices, 6 were in the Customs service, 42 were in the Internal Revenue service, 3 were in the Marine Hospital service, 3 were employees in public buildings, and 4 were special commissioners.

THE WAR DEPARTMENT.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located. Includes all employees of the department in the following offices:

Office of the Secretary.
Record and Pension Office.¹
Office of the Adjutant-General.¹
Office of the Inspector-General.
Office of the Judge-Advocate-General.
Office of the Quartermaster-General.
Office of the Commissary-General of Subsistence.
Office of the Surgeon-General.
Office of the Paymaster-General.
Office of the Chief of Engineers.
Office of the Chief of Ordnance.
Office of the Chief Signal Officer.
Bureau of Insular Affairs.
Board of Ordnance and Fortification.

Quartermaster's Department at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 chief clerk and 44 employees of the quartermaster's depot at Washington, D. C., and 4 employees under the quartermaster, Washington Barracks, District of Columbia.

Subsistence Department at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, except 3 clerks employed at Washington Barracks, District of Columbia.

Medical Department at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

¹ The Record and Pension Office and the Office of the Adjutant-General have since been combined, forming the Office of the Military Secretary.

Pay Department at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 31 paymaster's clerks and 5 paymaster's messengers, who were employed in the office of the Paymaster-General, at Washington, D. C.

Engineer Department at large (including Mississippi River Commission).—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 126 employees.

Ordnance Department at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Signal service at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 electrical engineer, 1 draftsman, 1 instrumentmaker, 2 electricians, and 1 messenger.

Headquarters of the Army.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 chief clerk, 23 clerks, and 7 messengers.

Office of Superintendent of State, War, and Navy Department building.—Is considered as in the District of Columbia, and all employees reported were so located.

National military parks.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 commissioner, 1 assistant in historical work, 1 clerk, and 1 messenger of the Chickamauga and Chattanooga National Military Park Commission.

Employees at the Military Academy were not reported. Of the 13,914 employees shown for the War Department in Table 2, 4,235 were employed in the Quartermaster's Department at large, 150 in the Subsistence Department at large, 623 in the Medical Department at large, 6,126 in the Engineer Department at large, 142 in the Mississippi River Commission, 2,580 in the Ordnance Department at large, 1 in the Board of Ordnance and Fortification, 11 in the Signal service at large, 1 in the Artillery School, 3 in the recruiting rendezvous, 2 in the district of Porto Rico, 4 in the General Service and Staff College, 1 in the Cavalry and Field Artillery School, and 35 in the Gettysburg National Park.

DEPARTMENT OF JUSTICE.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located, with the exception of 9 examiners for the prosecution of crimes, 1 special agent for the violation of intercourse acts, 5 special attorneys for the defense of Indian depredation claims, 5 assistant attorneys, 1 special agent, and 3 interpreters employed for the defense of claims before the Spanish Treaty Claims Commission stationed in Cuba.

The department proper includes all employees in the following offices:

Office of the Attorney-General.
Office of the Solicitor of the Treasury.
Special appropriations.
Spanish Treaty Claims Commission.

Penitentiaries.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Deputy United States marshals and clerks to United States attorneys.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 1 chief office deputy marshal, 30 office deputy marshals, and 5 clerks to the United States attorney, District of Columbia.

Of the 70 employees shown for the Department of Justice in Table 2, 14 were employed in the Department of Justice proper, 20 by the Spanish Treaty Claims Commission, 7 by the Commission to Revise the Laws of the United States, 26 at the new penitentiary site, Fort Leavenworth, Kans., and 3 on construction work at the penitentiary in Atlanta, Georgia.

THE POST OFFICE DEPARTMENT.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located, with the exception of 6 assistant superintendents of salaries and allowances belonging to the Office of the First Assistant Postmaster-General, but employed in various parts of the United States; 17 employees of the Stamped Envelope Agency, at Hartford, Conn., and 3 employees of the Postal Card Agency, at Rumford Falls, Me. It also includes 7 division superintendents, 66 special agents, 61 route inspectors, and 31 employees at clerk division headquarters, besides the employees of the Post Office Inspection service in which there are 12 post office inspectors in charge, 167 post office inspectors, 43 clerks, and 2 laborers, all employed elsewhere than in the District of Columbia.

The department proper includes all employees in the following offices:

Office of the Postmaster-General.
Offices of the Assistant Postmasters-General.
Office of the Assistant Attorney-General.
Office of the Topographer.
General Office.
Post Office Inspection service.
Postage Stamp Agency.
Stamped Envelope Agency.
Postal Card Agency.

Post Office service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 512 miscellaneous employees, 251 carriers, and 33 substitutes in the Washington city post office.

Rural Free Delivery service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 2 rural letter carriers and 1 substitute.

Railway Mail service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located. The 19 clerks on ocean steamers are included in Railway Mail service.

Mail bag and mail lock repair shops.—All employees were in the District of Columbia, but are considered in this report as located elsewhere.

Of the 85,093 employees shown for the Post Office Department in Table 2, 1 was an employee of the Post Office Department proper, 1 an employee of the mail bag repair shop, 40 were general officers in the Railway Mail service, 74,196 were postmasters, and 10,855 were employees in nonfree delivery post offices.

THE NAVY DEPARTMENT.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located, except 22 in the branch offices of the Hydrographic Office, 2 in the office of the assistant quartermaster at Philadelphia, Pa., 1 in the office of the assistant paymaster of the United States Marine Corps, at San Francisco, Cal., and 28 at United States navy pay offices.

The department proper includes all employees in the following offices:

- Office of the Secretary.
- Bureau of Yards and Docks.
- Bureau of Equipment.
- Bureau of Navigation.
- Bureau of Ordnance.
- Bureau of Construction and Repair.
- Bureau of Steam Engineering.
- Bureau of Supplies and Accounts.
- Bureau of Medicine and Surgery.
- Office of the Judge-Advocate-General.
- Office of Naval War Records.
- Library of the Navy.
- Hydrographic Office.
- Naval Observatory.
- Nautical Almanac Office.
- Office of Naval Intelligence.
- Headquarters, Marine Corps.
- Navy Pay Offices.

Navy yards and naval stations.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 145 employees at the Washington Navy Yard, and 8 employees in the Navy Pay Office, at Washington, D. C. The Naval Proving Grounds are included under this head.

The Naval Home, at Philadelphia, Pa., and the Naval Academy, at Annapolis, Md., were not reported. Table 2 shows that 18,449 employees in the Navy Department were not reported; of this number 18,140 were employed in navy yards and at naval stations, 46 in navy pay offices, and 263 at the Naval Proving Grounds, Indian Head, Maryland.

THE DEPARTMENT OF THE INTERIOR.

The department proper.—Is considered as in the District of Columbia, and, with the exception of 5, all employees reported were so located. The department proper includes all employees in the following offices:

- Office of the Secretary.
- Office of the Assistant Attorney-General.
- General Land Office.
- Office of Indian Affairs.
- Pension Office.
- Patent Office.
- Bureau of Education.
- Office of the Register of Wills, District of Columbia.
- Office of the Commissioner of Railroads.
- United States Geological Survey.

Land service.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located. The Land service includes:

- Miscellaneous Land service.
- Offices of United States Surveyors-General.
- United States Land Offices.

Indian service, miscellaneous.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located. The Indian service, miscellaneous, includes:

- Indian agencies.
- Indian school service.

Pension agencies.—Are considered as elsewhere than in the District of Columbia, and all employees reported were so located, with the exception of 25 at Washington, D. C.

Government Hospital for the Insane.—Is considered as located elsewhere than in the District of Columbia.

Miscellaneous branches of the Department of the Interior.—Are considered as in the District of Columbia, although they include a few employees who were located elsewhere. Under this head the following branches are included:

- National Parks and Reservations.
- Freedmen's Hospital.
- Columbia Institution for the Deaf and Dumb.

In this report the Department of the Interior does not include the Five Civilized Tribes Commission, Howard University, the office of the Recorder of Deeds of the District of Columbia, the Officials of the Territories, and the office of the Inspector of Gas and Meters of the District of Columbia. All employees in the office of the Register of Wills are appointed by him and are not included in this bulletin. Of the 2,589 employees shown in Table 2, for the Department of the Interior, 17 were employees of the department proper and 2,572 were chiefly Indians employed in the Indian service.

DEPARTMENT OF AGRICULTURE.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located, with the exception of 1,147 in the Weather

Bureau, 1,255 in the Bureau of Animal Industry, 74 in the Bureau of Plant Industry, 212 in the Bureau of Forestry, 3 special agents in the Bureau of Chemistry, 76 employees in the Bureau of Soils, 57 in the Bureau of Statistics, 9 in the Division of Entomology, 12 in the Division of Biological Survey, 1 located in New York on contingent expenses, 67 in the Office of Experiment Stations, and 12 on Public Road Inquiries. The Department of Agriculture includes the employees in the following offices:

Office of the Secretary.
Weather Bureau.
Bureau of Animal Industry.
Bureau of Plant Industry.
Bureau of Forestry.
Bureau of Chemistry.
Bureau of Soils.
Bureau of Statistics.
Division of Foreign Markets.
Division of Entomology.
Division of Biological Survey.
Division of Accounts and Disbursements.
Division of Publications.
Library.
Museum.
Contingent Expenses.
Office of Experiment Stations.
Public Road Inquiries.

DEPARTMENT OF COMMERCE AND LABOR.

The department proper.—Is considered as in the District of Columbia, and all employees reported were so located, with the exception of 4 special agents at Seal Island, Alaska, and 2 inspectors for protection of the salmon fisheries of Alaska, 21 employees of the Bureau of Labor, 1 census clerk at Philadelphia, 2 census clerks stationed at New York, 7 expert special agents of the Census, 595 special agents of the Census, and 18 special agents of the Census who had been appointed but who had not entered upon duty, 80 employees of the Coast and Geodetic Survey, 178 employees in the Bureau of Fisheries, and 50 employees in the offices of the United States Shipping Commissioners.

The department proper includes all employees in the following offices:

Office of the Secretary.
Bureau of Corporations.
Bureau of Labor.
Office of the Light House Board.
Bureau of the Census.
Coast and Geodetic Survey.
Bureau of Statistics.
Steamboat Inspection service.
Bureau of Fisheries.
Bureau of Navigation.
United States Shipping Commissioners.
Bureau of Immigration.
Bureau of Standards.

Light House service at large.—Is considered as elsewhere than in the District of Columbia, and all em-

ployees reported were so located, with the exception of 1 custodian of light house property.

Steamboat Inspection service at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

Immigration service at large.—Is considered as elsewhere than in the District of Columbia, and all employees reported were so located.

As shown in Table 2, there were 194 employees in the Department of Commerce and Labor for whom statistics were not reported.

INTERSTATE COMMERCE COMMISSION.

Is considered as in the District of Columbia, and all employees reported were so located.

UNITED STATES CIVIL SERVICE COMMISSION.

Is considered as in the District of Columbia, and all employees reported were so located.

GOVERNMENT PRINTING OFFICE.

Is considered as in the District of Columbia, and all employees reported were so located.

THE SMITHSONIAN INSTITUTION.

Is considered as in the District of Columbia, and all employees reported were so located. It includes:

United States National Museum.
Astrophysical Observatory.
International Exchanges.
National Zoological Park.
Bureau of American Ethnology.

As shown by Table 2, there were 4 employees for whom no statistics were reported.

CHARACTER OF APPOINTMENT.

The character of appointment indicates the standing of the employee with reference to civil service rules; it refers to the employee's standing in the position occupied July 1, 1903, and not necessarily to the original appointment. The appointments are classified in 9 groups, as follows:

1. *Presidential.*—Includes all persons appointed by the President subject to confirmation by the Senate.

2. *Excepted.*—Includes persons appointed to permanent positions in the classified service without examination, and all persons appointed by the President without confirmation by the Senate.

3. *Examination.*—Includes persons appointed through competitive examination under the civil service rules.

4. *Classification or extension.*—Includes persons whose positions, during their incumbency, have been made competitive by an act of Congress or order of the Executive either classifying these positions or extending the classified service to cover the branch of the civil service in which these persons were employed.

5. *Preference*.—Includes persons appointed through examination who were given preference under the provisions of section 1754, Revised Statutes: "Persons honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty shall be preferred for appointments to civil offices, provided they are found to possess the business capacity necessary for the proper discharge of the duties of such offices."

6. *Temporary*.—Includes persons temporarily employed under the provisions of Rule VIII of the civil service rules, which provides that where an emergency requires a vacancy to be filled before the appointment can be made from certification, a request for certification shall first be made, after which such vacancy may be filled by an emergency appointment. Also, that where there are fewer than three eligibles on any register, the Commission shall certify the names thereon, and if the appointing officer shall elect not to make a probational appointment therefrom, he shall select for temporary appointment the one eligible or one of the two eligibles, unless reasons satisfactory to the Commission are given why the selection should not be so made, and that where the work is temporary in character, after the completion of which the services of the employee will not be further needed, a temporary appointment may be made, with the prior consent of the Commission, for a period not to exceed three months.

7. *Unclassified*.—Includes persons whose positions are not subject to appointment under civil service rules, except those whose appointment is subject to confirmation by the Senate and those whose classification was pending at the time these data were collected.

8. *Classification pending*.—Includes certain persons in the Philippines whose classification was under consideration on July 1, 1903.

9. *Noncompetitive*.—Includes persons appointed through noncompetitive examinations under the provisions of Rule III, paragraph 2, civil service rules,¹ which provides that where, in its opinion, the conditions of good administration warrant, the Commission may give noncompetitive examinations to test fitness for (a) transfer, reinstatement, or promotion; (b) appointment of Indians to certain positions in the Indian service at large; (c) appointment of the wife of the superintendent of an Indian school as teacher or matron therein; (d) employment as inspector of safety appliances by the Interstate Commerce Commission.

The number of employees in the District of Columbia and elsewhere holding positions under each of these classes of appointment, also their ages, periods of service, and salaries, are shown in Tables 58, 59, and 61.

The Presidential appointees, unclassified employees, and employees whose classification was pending and whose character of appointment was not reported, are considered as holding "unclassified" positions; all the

others are considered as holding "classified" positions, being amenable to the civil service rules and regulations. The following table shows the number and proportion of the "classified" and "unclassified" employees in each of the 13 departments and independent offices:

TABLE 4.—Number and per cent of classified and unclassified employees in each department and independent office.

DEPARTMENT OR INDEPENDENT OFFICE.	Total.	CLASSIFIED.		UNCLASSIFIED.	
		Num-ber.	Per-cent.	Num-ber.	Per-cent.
Total.....	150,383	124,737	82.9	25,646	17.1
Department of State.....	113	109	96.5	4	3.5
Treasury Department.....	23,053	19,516	84.7	3,537	15.3
War Department.....	10,799	10,132	93.8	667	6.2
Department of Justice.....	792	758	95.7	34	4.3
Post Office Department.....	89,747	72,230	80.5	17,517	19.5
Navy Department.....	2,295	2,262	98.6	33	1.4
Department of the Interior.....	8,399	7,360	87.6	1,039	12.4
Department of Agriculture.....	4,115	3,635	88.3	480	11.7
Department of Commerce and Labor.....	6,433	4,717	73.3	1,716	26.7
Interstate Commerce Commission.....	147	131	89.1	16	10.9
Civil Service Commission.....	126	120	95.2	6	4.8
Government Printing Office.....	4,027	3,528	87.6	499	12.4
Smithsonian Institution.....	337	239	70.9	98	29.1

In every department by far the largest proportion of the employees reported were classified. The unclassified employees assumed considerable proportions in the Smithsonian Institution, where the actual number, however, was only 98, and also in the Department of Commerce and Labor, where they included 613 special agents engaged in the collection of cotton ginning statistics throughout the Southern states, being employed only at short intervals during the year. The largest number of unclassified employees, 17,517, was reported for the Post Office Department; this number constituted about one-fifth of the total number of employees reported in that department and about two-thirds of the total number of unclassified employees reported in all departments.

The 326 persons holding positions for which classification was pending were employed in the War Department in the Quartermaster's, Subsistence, Engineer, Medical, and Ordnance departments at large, and the Signal service at large. Of the 296 employees holding noncompetitive appointments, 284 were in the Indian service of the Department of the Interior and 12 in the Interstate Commerce Commission. The number of employees reported as Presidential appointees, 1,050, is not fairly representative of this class, since a large number of postmasters and other persons holding appointments of this character are not included. In the following table, therefore, the 1,050 persons reported for this class, together with the 326 for whom classification was pending, the 47 for whom the character of appointment was not reported and the 24,223 employees reported as unclassified are included under the general head "unclassified positions." This table shows for all employees, for those located in the District of Columbia, and for those located else-

¹ Twentieth Annual Report of the United States Civil Service Commission.

where, the number and proportion in each class of appointment.

TABLE 5.—*Employees in the District of Columbia and elsewhere classified by character of appointment.*

CHARACTER OF APPOINTMENT.	TOTAL.		IN THE DISTRICT OF COLUMBIA.		ELSEWHERE.	
	Number.	Per cent.	Number	Per cent.	Number.	Per cent.
Total.....	150,383	100.0	25,675	100.0	124,708	100.0
Excepted.....	6,650	4.4	1,360	5.3	5,290	4.2
Examination.....	78,159	52.0	9,261	36.1	68,898	55.3
Classification or extension.....	38,264	25.4	11,334	44.1	26,930	21.6
Preference.....	415	0.3	173	0.7	242	0.2
Temporary.....	963	0.6	133	0.5	820	0.7
Noncompetitive.....	296	0.2	12	(1)	284	0.2
Unclassified positions.....	25,646	17.1	3,402	13.3	22,244	17.8

¹ Less than one-tenth of 1 per cent.

More than half—52 per cent—of the positions for which reports were received were filled through examination, and about one-fourth—25.4 per cent—were brought into the classified service through its extension. Only two-tenths of 1 per cent of the positions were filled by noncompetitive examinations; the excepted, the preference, and the temporary appointments formed 5.3 per cent of the total, and the positions grouped as unclassified constituted 17.1 per cent. Considerable difference is shown between the District of Columbia and elsewhere as regards the relative importance of the positions filled by examination and by the extension of the civil service rules. Of the number of employees in the District, only 36.1 per cent held positions obtained by examination, while this class represented 55.3 per cent of the employees outside the District; but by the extension of the civil service regulations 44.1 per

cent of the employees in the District have come within the classified service, as compared with 21.6 per cent of those in positions elsewhere. The proportion of the positions grouped as unclassified was somewhat larger outside than within the District. Following the same grouping of positions according to character of appointment, the following table shows the number and proportion of each class employed in the District of Columbia and elsewhere:

TABLE 6.—*Number and per cent of employees in the District of Columbia and elsewhere in each class of appointment.*

CHARACTER OF APPOINTMENT.	Total.	IN THE DISTRICT OF COLUMBIA.		ELSEWHERE.	
		Number.	Per cent.	Number.	Per cent.
Total.....	150,383	25,675	17.1	124,708	82.9
Excepted.....	6,650	1,360	20.5	5,290	79.5
Examination.....	78,159	9,261	11.8	68,898	88.2
Classification or extension.....	38,264	11,334	29.6	26,930	70.4
Preference.....	415	173	41.7	242	58.3
Temporary.....	963	133	14.0	820	86.0
Noncompetitive.....	296	12	4.1	284	95.9
Unclassified positions.....	25,646	3,402	13.3	22,244	86.7

The largest proportion of the employees in each class of appointment was located outside of the District of Columbia, the proportion ranging from 58.3 per cent, shown for the preference, to 95.9 per cent for the noncompetitive group. Of the preference appointees a greater proportion—41.7 per cent—than of any other group was employed in the District of Columbia.

The distribution by departments and independent offices of the number of persons in each class of appointment located in the District and of the number located elsewhere is shown in the following table:

TABLE 7.—*DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO CHARACTER OF APPOINTMENT BY DEPARTMENTS AND INDEPENDENT OFFICES.*

¹ Less than one-tenth of 1 per cent.

It is evident from this table that there were wide differences in the extent to which the several classes of appointments were represented in the different departments. For instance, the employees of the Treasury Department holding classified positions formed 23.8 per cent of the total number in the District of Columbia, but of the 1,360 excepted positions in the District, only 18, or 1.3 per cent, were in the Treasury. On the other hand the Department of Agriculture, which contained only 16.3 per cent of the employees holding classified positions in the District of Columbia, had 1,167, or 85.8 per cent of the excepted appointees. To take another instance, the Treasury Department, which gave employment to 14,221, or 13.9 per cent of the persons holding classified positions located elsewhere than in the District of Columbia, had 2,741 excepted appointees, or 51.8 per cent of the excepted positions outside of the District.

In some respects a special interest attaches to the employees holding positions through examination. There were 9,261 employees of this class reported located in the District of Columbia and 68,898 elsewhere. Of those in the District, 29.1 per cent were in the Treasury Department; of those outside, only 8.8 per cent. The Post Office Department, which had only 6.9 per cent of the employees appointed through examination in the District of Columbia, had 79.2 per cent of the employees of this class outside of the District.

The following table shows for each department and independent office the percentage which the number of employees in each class of appointment was of the total number and the percentage which the number holding classified and unclassified positions, respectively, was of the total number, distinguishing the employees located in the District of Columbia from those located elsewhere:

TABLE 8.—PER CENT DISTRIBUTION, BY CHARACTER OF APPOINTMENT, OF EMPLOYEES IN EACH DEPARTMENT AND INDEPENDENT OFFICE.

¹ Less than one-tenth of 1 per cent.

This table permits of an analysis of the force of each department in regard to their location according to the character of appointment. To illustrate the use of the table, the Post Office Department, for which the greatest number is reported, may be considered. Of the total number of employees for this department, located in the District of Columbia, 93.7 per cent held classified positions and 6.3 per cent unclassified positions, and for those located elsewhere than in the District the proportions were 80.3 and 19.7 per cent, respectively, indicating a considerably larger proportion of classified positions in the District of Columbia. Of the classified positions in this department, the largest proportion in the District, 52.1 per cent, were included in the service by classification, or extension, while the same group forms

only 16.7 per cent of those located elsewhere. In the positions outside of the District the largest proportion, 61.9 per cent, was included in the classified service by examination, as compared with 40.9 per cent for the same group in the District. The table as a whole indicates that in each department the proportion of classified positions was large, both within the District of Columbia and elsewhere. The proportion of positions brought within the classified service through the extension of the civil service regulations (classification) was much larger within the District than elsewhere. This difference is noticeable in each of the departments which reported employees located without as well as within the District.

The limitation in the age at which persons can receive

appointment by examination establishes a relationship between the character of the appointment, the age, and the period of service. The positions held under the different classes of appointment should also be considered in connection with the salary. The statistics covering all four of these factors are shown in detail in

Tables 58, 59, and 61, and the statistics for age and period of service are discussed on pages 27 to 35.

In the following table the employees in each class of appointment are distributed according to period of service, the employees in the District of Columbia and those elsewhere being presented separately:

¹ Less than one-tenth of 1 per cent.

The greatest concentration of aggregate employees at any given service period is shown for "Less than 1 year." This is true, also, of employees shown separately for elsewhere than in the District of Columbia and for all the classes but "excepted" and "classification." The employees in the District of Columbia who had been in the service for a longer period than five years formed 58.4 per cent of the entire force located there, the corresponding proportion for the classified positions in the District being 62.5 per cent, and for the unclassified 31.5 per cent. The percentage of long term employees holding classified positions exceeded that for the unclassified by 31 per cent, indicating a considerably longer term for all positions in the classified service. The longest period of service is that

shown for employees included in the classified service by the extension of the civil service regulations. This group, designated as "classification," includes 11,334 employees in the District of Columbia and 26,930 located elsewhere, many of whom had been in the service for a number of years prior to their inclusion in the classified service. Of the employees of this class in the District of Columbia 63.8 per cent had been in the service for ten years or more, the corresponding proportion for those outside the District being 56 per cent. Thus considerably more than half of the employees in this group, both within and outside of the District, had been in the service for more than ten years on July 1, 1903, and of those within the District 34.4 per cent had seen more than twenty years of service,

compared with 19.6 per cent for those employed elsewhere.

Employees holding appointments obtained through examination formed the next largest group, and 9,261 of them were reported as employed in the District, less than half of whom, 45.1 per cent, had been in the service for more than five years and only 23.8 per cent for more than ten years. There were 68,898 employees of this class located outside of the District and 35.5 per cent of them had been in the service for more than five, and 16.8 per cent for more than ten years.

In general the figures show a longer period of service for the classified employees than for the unclassified, and a longer period within the District of Columbia

than elsewhere for employees of the same class. Of the employees in the classified service within the District 62.5 per cent had been in the service for five years or more, and 43.4 per cent for ten years or more. Outside of the District the corresponding percentages for classified employees were 45.2 and 26.5, respectively. In the unclassified positions 31.5 per cent of employees within the District had been in the service for five years or more, and 13 per cent for ten years or more, the corresponding percentages outside of the District being 8 and 2, respectively. The percentage of the total employees at each period of service holding positions under each of the classes of appointment is shown by the following table:

¹ Less than one-tenth of 1 per cent.

The employees who had been in the service from five to nine years, may be taken to illustrate the use of this table. Of the total number of such persons employed in the District of Columbia, 87.1 per cent held classified positions, and 12.9 per cent unclassified, while the corresponding percentages for the employees located elsewhere than in the District were 93.5 and 6.5 per cent, respectively. Of the 87.1 per cent holding classified positions in the District, 4.1 per cent were classed as "excepted," 40.4 per cent as "examination," 41.8 per cent as "classification," six-tenths of 1 per cent as "preference," two-tenths of 1 per cent as "temporary," while the "noncompetitive" were less than one-tenth of 1 per cent. The corresponding proportions for the 93.5 per cent shown for the same group

located elsewhere were 5.3, 62.6, 25.1, one-tenth of 1 per cent, one-tenth of 1 per cent, and three-tenths of 1 per cent, respectively.

The salaries of employees holding positions under the different classes of appointment should be considered in connection with the period of service, and such comparison is made in detail in Table 59, where the employees for each character of appointment are grouped according to their years of service and salary. The following table shows the number of appointees for each class of appointment distributed according to annual salary, with the percentage at each salary, the employees in the District of Columbia and those located elsewhere being shown separately:

TABLE 11.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO CHARACTER OF APPOINTMENT, BY SALARY GROUPS.

¹ Includes 613 special agents receiving a per diem salary, and who are employed at short intervals during the year.² Less than one-tenth of 1 per cent.

The salary or rate of pay was not reported for a number of persons reported, both in and outside of the District of Columbia, and numbers were employed on piecework for which the annual salary could not be computed; these are included in order to preserve the proportion at the different salaries, but for other purposes could properly be omitted. Considering the employees in the District of Columbia, it appears that one-fourth of them received less than \$720 per annum; the proportion was considerably larger for the "excepted," "temporary," and "unclassified" positions, reaching 70.3 per cent in the case of the last named. The next greatest number is that shown for the employees receiving \$1,200, but less than \$1,400 per annum. This group constituted 19.9 per cent of the aggregate, and even larger proportions are shown for it in the positions obtained by "examination" or "classification," and among "temporary" employees. Almost one-fourth of those included under "examination" and "classification" were paid at this rate. The employees receiving \$1,000 and more but less than \$1,600, formed 40.2 per cent of the aggregate number considered as in the District of Columbia and constituted 43.9 and 47.1 per cent, respectively, of those classed as "examination" and "classification." The proportions at the higher rates of salary, \$1,600 and more per annum, were naturally small for all branches of the service.

Outside of the District of Columbia it appears that the

proportion of the employees receiving less than \$720 per annum, 35 per cent, was considerably larger than it was within the District, and this proportion is largely increased for the employees holding appointments through "examination," and for the "temporary" and "noncompetitive" appointees. The next largest concentration is shown for the employees receiving \$1,000 but less than \$1,200, 16.7 per cent being reported for this salary group, which is one grade lower than the group showing the second largest concentration for positions in the District of Columbia. The concentration at this salary was especially pronounced in the positions held by "examination" and "classification," being greatest in the former class of positions. The employees receiving \$1,000 or more but less than \$1,600 formed 32.1 and 34.1 per cent, respectively, of the "examination" and "classification" classes, these proportions being considerably smaller than those for the same classes in the District of Columbia. The table as a whole indicates that, as a rule, larger proportions were employed at the higher salaries in the District of Columbia than elsewhere; but in order to make the comparison more exact, the following table is presented in which the numbers employed on piecework, and those for which the compensation was not reported, or those serving without compensation, and certain special agents referred to elsewhere, are excluded. The number considered has, therefore, been reduced to 134,056.

TABLE 12.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO CHARACTER OF APPOINTMENT, BY SALARY GROUPS, EXCLUSIVE OF THOSE PAID BY THE PIECE AND OF THOSE WHO WERE WITHOUT SALARIES OR FOR WHOM SALARIES WERE NOT REPORTED AND 613 SPECIAL AGENTS.

¹ Less than one-tenth of 1 per cent.

The employees receiving less than \$720 per annum may be taken to illustrate the use of this table. Of the total number of such employees in the District of Columbia, 62.8 per cent held classified positions and 37.2

per cent unclassified positions; the corresponding proportions for the employees located elsewhere being 85.6 and 14.4 per cent, respectively. The 62.8 per cent holding classified positions in the District includes 14.8

per cent classed as "excepted," 32.2 per cent as "examination," 14.8 per cent as "classification," two-tenths of 1 per cent as "preference," eight-tenths of 1 per cent as "temporary," and less than one-tenth of 1 per cent as "noncompetitive." The corresponding proportions for the 85.6 per cent shown for the same groups located elsewhere were 3.5, 63.7, 16.8, one-tenth of 1, 1, and five-tenths of 1 per cent, respectively.

SEX.

There were 137,061 males and 13,322 females reported as employed in the Executive Civil Service, the numbers forming 91.1 and 8.9 per cent, respectively, of the total number of employees. The following table shows the number of each sex reported as employed in each department, bureau, and independent office:

TABLE 14.—MALES AND FEMALES IN EACH DEPARTMENT, BUREAU, AND INDEPENDENT OFFICE OF THE EXECUTIVE CIVIL SERVICE.

While both males and females were employed in all but 9 of the departments, bureaus, and independent offices shown in the above table, the proportion each sex formed of the total number of employees varied in the respective departments, and in order to determine their relative importance the following table is presented, showing the number and per cent of males and of females in each department and independent office:

TABLE 15.—Number and per cent of males and of females in each department and independent office.

DEPARTMENT OR INDEPENDENT OFFICE.	Total.	MALES.		FEMALES.

The character of the work required of the employees is probably the controlling factor in determining the

proportion of males and females that can with advantage be given employment in any branch of the service, but the preceding table shows that in no instance did the percentage of females approach that of the males. Of the total number of males employed in the Executive Civil Service, 62.5 per cent were reported by the Post Office Department, the same department giving employment to 30.6 per cent of the females, but the male employees formed 95.5 per cent of the total force of the department and the female only 4.5 per cent. These proportions were reversed in the Treasury Department, which gave employment to only 14.3 per cent of the total number of males and 26.2 per cent of the females, but even in this department, with its relatively greater number of females, the males formed 84.8 per cent of the total force and the females 15.2 per cent. The Department of the Interior gave employment to 4.2 per cent of all males and 19.7 per cent of all females, but males formed 68.7 and females 31.3 per cent of its total force.

The statistics concerning the character of appointment are shown in detail in Tables 58, 59, 60, and 61, and are discussed on pages 14 to 22, but the following summary is presented in connection with the statistics of sex in order to show the number and proportion of male and female employees, respectively, who held positions under each of the nine classes of appointment:

TABLE 16.—Number and per cent of males and of females in each class of appointment.

CHARACTER OF APPOINTMENT.	Total.	MALES.		FEMALES.	
		Num-ber.	Per-cent.	Num-ber.	Per-cent.
Aggregate	150,383	137,061	91.1	13,322	8.9
Classified	124,737	114,538	91.8	10,199	8.2
Excepted	6,650	6,174	92.8	476	7.2
Examination	78,159	73,109	93.5	5,050	6.5
Classification or extension	38,264	33,787	88.3	4,477	11.7
Preference	415	415	100.0		
Temporary	953	871	91.4	82	8.6
Noncompetitive	296	182	61.5	114	38.5
Unclassified	25,646	22,523	87.8	3,123	12.2
Not reported	47	45	95.7	2	4.3
Presidential	1,050	1,045	99.5	5	0.5
Unclassified	24,223	21,109	87.1	3,114	12.9
Classification pending	326	324	99.4	2	0.6

The male employees held the largest proportion of both the classified and unclassified positions. All the positions classed as "preference claimant" were necessarily held by males and more than 99 per cent of the positions classed as "Presidential" and "classi-

fication pending" were also held by males. The largest proportion of females is shown for the "noncompetitive" positions. The proportion of females in the unclassified service is much larger than in the classified, because of the extent to which this sex is employed in the Post Office, Treasury, and Interior departments, these branches of the service giving employment to 2,660, or 85.2 per cent of all unclassified females.

Of the 137,061 male employees, 18,793, or only 13.7 per cent, were located in the District of Columbia, and 118,268, or 86.3 per cent, were located elsewhere. The female employees were about evenly divided between the District of Columbia and elsewhere, the numbers and percentages being 6,882, or 51.7 per cent, and 6,440, or 48.3 per cent, respectively.

The period of service of the male and female employees, respectively, should be considered in connection with their ages and salaries, and detailed statistics concerning such matters are shown in Table 67.

In the following table the males and females employed in the District of Columbia and elsewhere are separately classified by age periods:

TABLE 17.—DISTRIBUTION OF MALES AND OF FEMALES, BY AGE PERIODS.

AGE PERIOD.	AGGREGATE.		IN THE DISTRICT OF COLUMBIA.						ELSEWHERE.					
			Total.		Males.		Females.		Total.		Males.		Females.

70 years and over	1,504	1.0	512	2.0	460	2.5	52	0.8	992	0.8	971	0.8	21	0.3

This table indicates that, as a rule, the proportion of females at the lower age periods was considerably in excess of that of the males. In the District of Columbia 58.8 per cent of the females in the civil service were under 40 years of age, but only 48 per cent of the males; outside of the District the per cent of females under 40 years was 69.3, of males 60.5. Only 6.2 per cent of the females in the District were over 60 years of age, while 14.3 per cent of the males had attained that age.

The greatest concentration of total employees, wherever located, was at the age period of 30 to 39 years, the percentages being 27.2 in the District of Columbia and 31.5 elsewhere. This concentration was true for both sexes in the District of Columbia and for males elsewhere. The greatest concentration of female employees located outside of the District of Columbia, however, was at the age period of 20 to 29 years.

In Tables 72 and 73 the males and females employed in the District of Columbia and elsewhere are classified

according to the salary received. The following table is a summary of this classification:

TABLE 18.—Number and per cent of males and of females in each specified salary group.

SALARY.	Total.	MALES.		FEMALES.	
		Num-ber.	Per-cent.	Num-ber.	Per-cent.
Total	150,383	137,061	91.1	13,322	8.9
Less than \$720	50,047	43,714	87.3	6,333	12.7
\$720 but less than \$840	13,050	12,109	92.8	941	7.2
\$840 but less than \$960	8,929	8,757	98.1	172	1.9
\$960 but less than \$1,000	10,591	9,525	89.9	1,066	10.1
\$1,000 but less than \$1,200	22,911	21,817	95.2	1,094	4.8
\$1,200 but less than \$1,400	13,303	12,189	91.6	1,114	8.4
\$1,400 but less than \$1,600	8,270	7,870	95.2	400	4.8
\$1,600 but less than \$1,800	2,344	2,234	95.3	110	4.7
\$1,800 but less than \$2,000	2,045	2,030	99.3	15	0.7
\$2,000 but less than \$2,500	1,751	1,751	100.0		
\$2,500 and over	1,428	1,426	99.8	2	0.2
Piecework	1,587	979	61.7	608	38.3
Without salary	13,939	12,474	89.5	1,465	10.5
Salary not reported	188	186	98.9	2	1.1

In the above table the greatest number of employees of each sex are reported in the class receiving less

than \$720 per year. The percentages of males and females at this salary were 87.3 and 12.7 per cent, respectively. While comparatively few employees, 1,587, were reported as paid according to the quantity of work, and are grouped under piecework, this group contains the largest proportion, 38.3 per cent, of females. All of the employees receiving \$2,000, but less than \$2,500 per year, were males; only 2 females were reported as receiving \$2,500 and over per year. Considering the number receiving salaries, on a time basis, which range from a comparatively small amount to over \$2,500 per annum, it appears that 82,617, or 61.3 per cent of the total number, received less than \$1,000. Of this number, 74,105, or 89.7 per cent, were males and 8,512, or 10.3 per cent, were females. Of the remaining, 52,052, 49,317, or 94.7 per cent, were males, and 2,735, or 5.3 per cent, females. In this connection it should be remembered that the totals included employees usually classed as special agents and receiving salaries fixed on a per diem basis. A con-

siderable number of these agents were not employed constantly and their actual annual earnings were not as large as their indicated annual salary. The 8,270 employees reported as receiving \$1,400, but less than \$1,600 per annum, include 613 special agents of the Bureau of the Census who were employed at short intervals during the year and whose actual annual compensation did not average more than \$200. This number, therefore, should be excluded in order to show actual conditions.

In the table which follows the total number of male and female employees and the number located in the District of Columbia and elsewhere are distributed according to annual salary. In this the employees engaged on piecework, those for whom the salary was not known or not reported, those receiving no salary and the 613 special agents employed by the Bureau of the Census, have been excluded, thus reducing the total number of employees considered to 134,056 and placing the number at each salary on a comparable basis.

TABLE 19.—EMPLOYEES CLASSIFIED ACCORDING TO SEX, BY SALARY GROUPS, EXCLUSIVE OF THOSE PAID BY THE PIECE AND OF THOSE WITHOUT SALARY OR FOR WHOM SALARIES WERE NOT REPORTED AND 613 SPECIAL AGENTS.

¹ Less than one-tenth of 1 per cent.

Of the total number of males, 35.6 per cent received less than \$720 per annum, while 56.3 per cent of the females were in this class. In the District of Columbia the percentage of females receiving less than \$720 was 51.4, that of males being 18; outside of the District the corresponding percentages being 62.7 for females and 38.5 for males. The table indicates the extent of the concentration of the females at the lower, and of the males at the higher salaries.

The character of work, or occupation, in which the employees were engaged is discussed on pages 51 to 58, where the statistics are given in detail and the classes of work included under each occupation are described. The following table shows the total number of employees and the number and proportion of males and of females for each of the 6 general groups of occupations:

TABLE 20.—Number and per cent of males and of females in each occupation group.

OCCUPATION GROUP.	Total.	MALES.		FEMALES.	
		Number.	Per cent.	Number.	Per cent.
Aggregate	150,383	137,061	91.1	13,322	8.9
Clerical	102,431	95,065	92.8	7,346	7.2
Professional, technical, and scientific	6,689	6,530	97.6	159	2.4
Executive	1,677	1,653	98.6	24	1.4
Mechanical	7,181	7,091	98.7	90	1.3
Subclerical and laborers	26,888	21,427	79.7	5,461	20.3
Miscellaneous	5,517	5,275	95.6	242	4.4

The number of males and of females reported for each of the 6 occupation groups is only a general indication of their comparative importance in the different

branches of work required of the employees of the Executive Civil Service, and the detailed statistics given in Tables 63, 64, 70, 71, 72, and 73 should be consulted for more exact information. The largest proportion of males, 98.6 per cent, is shown for the occupations classed as "executive," while the largest proportion of females, 20.3 per cent, is reported for the "subclerical and laborers," the next largest proportion, 7.2 per cent, of females being shown for the "clerical" positions.

NATIVITY.

The 135,575 employees classed as "native" include all persons in the Executive Civil Service who are native born American citizens, and the 14,808 classed as "foreign" include all who are not native born American citizens, although they may have become naturalized citizens, or the country of their birth may have since been annexed to the United States. The numbers reported for native and foreign born constituted 90.2 and 9.8 per cent, respectively, of the total for all branches of the service. Of the native born employees, 122,967, or 90.7 per cent, were males and 12,608, or 9.3 per cent, were females; of the foreign born employees, 14,094, or 95.2 per cent, were males and 714, or 4.8 per cent, females. Table 3 shows that the foreign born were reported as employed in each of the 13 Executive departments and independent offices while 11,797, or almost 80 per cent of the total were employed in the Treasury, War, and Post Office departments. The foreign born employees in these departments were engaged in various branches of the service. In the Treasury Department the largest numbers were found in the Customs, Internal Revenue, Public Health and Marine Hospital, and Custodian services. In the War

Department the largest numbers were found in the Engineer, Ordnance, Subsistence, and Quartermaster's departments. In the Post Office Department the largest numbers were in the Rural Free Delivery and Railway Mail service.

WHENCE APPOINTED.

The United States statutes affecting the classified civil service provide that "certification for appointment in the departments or independent offices at Washington shall be so made as to maintain, as nearly as the conditions of good administration will warrant, the apportionment of such appointments among the several states and territories and the District of Columbia upon the basis of population." With the intention of ascertaining the apportionment of all employees in the District of Columbia on July 1, 1903, information concerning the Congressional district to which each employee was credited was obtained from the data furnished for the compilation of the Official Register for 1903. Upon examination of the data, however, it was found that in many instances the employees had reported the Congressional district from which they were originally appointed irrespective of any changes subsequently made in the Congressional districts of the state. It is impracticable to correct such errors, and as they were sufficient in number to vitiate the totals, the attempt to show the number credited to each Congressional district was abandoned. The states and territories to which the employees were credited were reported with reasonable accuracy, and Table 21 shows the number, considered as located in the District of Columbia, credited to each state or territory, classified by departments, bureaus, and independent offices in which they were employed on July 1, 1903.

More than one-fifth, or 5,348 of the 25,675 employees included in this table, were appointed from the District of Columbia; of the number so appointed 1,500, or 28 per cent, were employed in the Bureau of Engraving and Printing and 911, or 17 per cent, in the Government Printing Office, the majority in both offices holding comparatively unimportant positions. New York had the next greatest number of appointees, 2,206, and they were well distributed among all the departments and offices, the largest number, 436, being reported for the Government Printing Office. The Department of Agriculture reported the largest number of employees in the District of Columbia, the number being 4,115,

and this department had appointees from every state and territory except Alaska. The Department of the Interior proper, which reported the next largest number, was the only office that had one or more appointees for every state and territory.

WHERE EMPLOYED.

The distinction between the employees in the District of Columbia and elsewhere has been preserved whenever practicable in presenting these statistics by classifying the employees of each department, bureau, or office, in the manner explained on pages 10 to 14. The reports from which the data were compiled show also the

state and the city in which each employee was located on July 1, 1903. The tabulation of this data, however, developed such detail that it was not practicable to make a more elaborate presentation.

PERIOD OF SERVICE.

Under this title are presented statistics concerning the number of years that the employees were in the Executive Civil Service prior to July 1, 1903. It was intended that employees should report the total period of their service, whether continuous or intermittent, or whether in one branch of the service or several, but this intention seems not to have been clearly under-

stood. There were doubtless many who reported the length of service in the position occupied at the time the report was made.

Statistics concerning length of service are presented in connection with those relating to sex, age, character of appointment, character of work, and salary, and reference should be made to these topics for information as to the relation of the length of service to each. Table 68 shows in detail the number of employees in each department and independent office according to each year of service. The following table summarizes the totals so as to show the number and percentage for certain periods of service:

TABLE 22.—DISTRIBUTION, BY PERIOD OF SERVICE, OF THE EMPLOYEES IN EACH DEPARTMENT AND INDEPENDENT OFFICE.

¹ Less than one-tenth of 1 per cent.

Of the 13 departments and independent offices having employees in the District of Columbia, the Interstate Commerce Commission reported the greatest proportion, 58.5 per cent of employees, with a length of service of ten years or more; the smallest proportion, 16.5 per cent for the same period of service was reported by the Department of Commerce and Labor. The recent organization of this department and the inclusion of the Bureau of the Census account for the small per cent at the longer periods of service. Of the branches of the service located elsewhere than in the District, the Department of Commerce and Labor reported the

greatest proportion, 26.7 per cent, of employees who had been in the service for ten years or more, and the Department of Justice reported the smallest proportion, 5.6 per cent.

The table which follows shows the number and percentage of employees holding classified and unclassified positions at each period of service in the District of Columbia and elsewhere. The period of service of the 1,050 Presidential appointees should be considered independently, and these employees have therefore been omitted from the following table:

TABLE 23.—DISTRIBUTION OF THE CLASSIFIED AND THE UNCLASSIFIED EMPLOYEES, BY PERIOD OF SERVICE, EXCLUSIVE OF 1,050 PRESIDENTIAL APPOINTEES.

¹ Less than one-tenth of 1 per cent.

This table shows a longer period of service for the classified employees than for the unclassified and the term of service for the employees in the District of Columbia appears to be considerably longer than for those located elsewhere. Of the total number of classified employees in the District, 62.5 per cent had been in the service for five years or more, as compared with 45.2 per cent of the same class located elsewhere. Of the unclassified employees in the District, 30.8 per cent had been in the service for five years or more, as compared with 6.7 per cent of those located elsewhere.

AGE.

The ages of the employees were reported as of their last birthday prior to July 1, 1903. In the preceding

discussion the statistics of age have been combined with those relating to the sex and location of the employees, whether in the District of Columbia or elsewhere. There are also comments upon certain phases of the statistics of age under character of work and period of service. Reference should be made to each of these subjects for information concerning the age of the employees as related to the other factors affecting the personnel.

The following table shows the number of employees in each department and independent office in the District of Columbia included under each 10-year age group, and the proportion which the number in each age group bears to the total number in each department and independent office:

TABLE 24.—DISTRIBUTION, BY AGE PERIODS, OF THE EMPLOYEES IN EACH DEPARTMENT AND INDEPENDENT OFFICE IN THE DISTRICT OF COLUMBIA.

The largest proportion of employees was from 30 to 39 years of age, and with but three exceptions, those of the Treasury Department, the Department of the Interior, and the Smithsonian Institution, the largest proportion of the force of each department was reported for this group. The War Department had the largest proportion of the older employees, 40.9 per cent of the employees being over 50 years of age, while the Civil Service Commission had the least proportion, employees over 50 years of age constituting only 8.7 per cent of the entire force. As shown by Table 42 on page 50, the average age of all employees in the District of Columbia was 41 years. In connection with the percentage of age, the size of the departments and the date of their organization should be considered.

Age and period of service of employees are both taken into account in determining their efficiency and in making provision for superannuation. These statistics are, therefore, of great importance and are presented in

detail in Tables 65 and 67, which show for all classes of employees, exclusive of Presidential appointees, the number at each year of age distributed by each year of service; also a like distribution for the classified and unclassified employees in the District of Columbia, and the classified and unclassified employees located elsewhere. The details are summarized in Table 25 so as to give the number in each age period distributed according to term of service. In addition is presented the proportion which the number under each term of service period bears to the total number in each age period. In this as in the detailed table, there is presented, first, the total number of employees exclusive of Presidential appointees, and then those in the classified and those in the unclassified service for the District of Columbia and elsewhere, respectively. The 1,050 Presidential appointees have been excluded from tables relating to age because their period of service and age are of no special significance.

1 Less than one-tenth of 1 per cent.

The significance of the table may be shown by an illustration taken from the statistics first presented of all classes of employees. The largest number of employees, 46,162, is shown in the age period of 30 to 39 years. Of this number, 8,555 or 18.5 per cent, had been in the service for less than one year. The proportion of employees at this age for each year of service decreased constantly from the term of less than one year to that of four years, when it reached 6.3 per cent. But for the period of service of from 5 to 9 years it increased to 23.2 per cent and again decreased as the period of service lengthened, reaching five-tenths of 1 per cent for the period of from 20 to 29 years. Of the employees less than 20 years of age, 99.4 per cent had been in the service for less than five years; of those

from 20 to 29 years of age, 86.2 per cent; of those from 40 to 49 years of age, 40.5 per cent; of those from 50 to 59 years, 39.8 per cent; of those from 60 to 69 years, 29.9 per cent; of those from 70 to 79 years, 20.1 per cent; and of those 80 years of age and over, 9 per cent. It appears, therefore, that with the advance in age a larger proportion are in the service for longer periods of time, the highest number reported for five years of service and over being reached during the age period of from 30 to 39 years.

The following table shows the number and proportion of the classified and unclassified employees in the District of Columbia and elsewhere for each age period who had been in the service for ten years or more, July 1, 1903:

¹ Exclusive of 125 Presidential appointees.

This table shows that 25.2 per cent of the employees of the Executive Civil Service had been in the service for ten years or more prior to July 1, 1903. A considerably larger proportion—43.4 per cent of the classified employees in the District of Columbia and 26.5 per cent of the classified employees located elsewhere—had been in the service for a like period. Of the unclassified employees, only 12.7 per cent of those located in the District of Columbia and 1.6 per cent of those located elsewhere had been in the service for this length of time. The proportion of the total employees who had been in the service for ten years or a longer period naturally increased with the increase in the age periods. For obvious reasons no employees less than 20 years of age had been in the service for ten years. Of those from 20 to 29 years of age, 1.9 per cent had been in the service for ten years. This percentage increased rapidly and reached the highest point, 79.2 per cent, in the case of employees 80 years of age and over. Table 25 shows 46,162 employees in the age period of from 30 to 39 years. Of this number, 23.3 per cent had

been in the service for ten years or more, and of those holding classified positions, 31.8 per cent of those employed in the District of Columbia and 25.5 per cent of those employed elsewhere had been in the service for this period. Of the unclassified employees, 5.8 per cent of those located in the District and 1.1 per cent of those located elsewhere had been in the service for ten years. In addition to showing that the proportion of the employees in the service for long periods increases with the increase in age, the above table shows that the proportion of the employees in the District of Columbia who had been in the service for ten years or more was considerably larger than the proportion of the employees located elsewhere, and this is true of both the classified and unclassified positions.

The following table shows the number of employees in each age period holding positions under each class of appointment, with the proportion which the number in each age period bears to the total number in each class:

¹ Less than one-tenth of 1 per cent.

The concentration at each age period of those holding positions under each of the different classes of appointment appears from this table, and those located in the District of Columbia can be compared with those located elsewhere. For instance, of the 9,261 employees located in the District of Columbia holding appointments through examination, 3,405, or 36.8 per cent, were from 20 to 29 years of age. In the same age period of employees located elsewhere, 23,615, or 34.3 per cent, served under the same class of appointment.

The largest proportions of employees in the higher age periods, both for the District of Columbia and elsewhere, are found to be among those holding appointments through "classification," or appointed as "preference claimants."

The combination of the statistics for age with those for character of appointment and period of service has been made for the employees holding appointments through examination, for those holding competitive positions by classification or extension of the service, and for those classed as "preference claimants." These classes have been selected for this presentation because of their peculiar relationship to the application of civil service rules and regulations. These statistics are shown in detail in Table 60 for the employees in the District of Columbia, and the results are summarized in the following table, so as to show the number at each age period holding positions under each of the three classes of appointments, distributed according to the periods of service, with the percentage at each period:

TABLE 28.—EMPLOYEES IN THE DISTRICT OF COLUMBIA, CLASSIFIED ACCORDING TO AGE PERIODS, BY CHARACTER OF APPOINTMENT AND PERIOD OF SERVICE.

¹ Less than one-tenth of 1 per cent.

Comparing the three kinds of appointment, it is found that the longest period of service is shown for those employees holding competitive positions through classification or extension of the service, 81.8 per cent having been in the service for five years or more, as compared with 53.1 per cent and 45.1 per cent for the preference and examination appointees, respectively. The largest number of employees in the earlier age periods is naturally found among those appointed by

examination, only 25.4 per cent of the preference claimants and 31.9 per cent of those appointed by extension being less than 40 years of age. Of the 553 employees in the age period from 50 to 59 years holding appointments through examination, 352, or 62.6 per cent, had been in the service for more than ten years, while the corresponding proportions for those included under classification or extension and preference are 80.1 and 42.1 per cent, respectively.

There were 2,526 employees in the District of Columbia reported as holding competitive positions through classification or extension of the service who had been in the service from twenty to twenty-nine years. Of this number, 122 were 30 to 39 years of age and 796, 40 to 49.

The Executive Civil Service included 10,437 employees who were reported as 60 years of age and over. Of this number, 9,897, or 94.8 per cent, were males,

and 540, or 5.2 per cent, females. The statistics for this class of employees are of interest in connection with the consideration of provisions for superannuation, and they have accordingly been presented in detail. Tables 29 and 30 show the number of males and females, respectively, 60 years of age and over, in each department, bureau, and independent office in the District of Columbia and elsewhere, classified according to salary.

It will be noted that in Table 29 the largest number of male employees 60 years of age and over, 3,556, or 35.8 per cent, is shown for the Post Office Department. Of this number, 1,520, or 42.7 per cent, were employed in the Post Office service, 1,414, or 39.8 per cent, in the Rural Free Delivery service and 476 in the Railway Mail service, leaving only 146 for the other branches of the department. Of the 1,520 employees in the Post Office service, 570, or 37.5 per cent, received \$1,000 but less than \$1,200 per annum, while 817 of those in the Rural Free Delivery service received less than \$720 per annum and the remainder, 597, were re-

ported as receiving no salary, being substitute carriers. Of the female employees shown in Table 30 the largest number, 185, is shown for the Treasury Department, 128 of them being employed in the department proper. The majority of this number received \$900 or more but less than \$1,400 per annum. A comparison of the salaries of employees 60 years of age and over with the salaries of employees in general is made possible in the following table, which shows the proportion of the total males and females, respectively, and of those 60 years of age and over at each annual salary:

TABLE 31.—PER CENT DISTRIBUTION OF MALES AND OF FEMALES 60 YEARS OF AGE AND OVER, BY SALARY GROUPS. COMPARED WITH A SIMILAR DISTRIBUTION FOR THOSE UNDER 60 AND FOR THOSE OF ALL AGES.

SALARY.	AGGREGATE.			MALES.			FEMALES.		
	Total.	Under 60 years.	60 years and over.	Total.	Under 60 years.	60 years and over.	Total.	Under 60 years.	60 years and over.

¹ Less than one-tenth of 1 per cent.

The comparison of the proportions given in this table is interesting. It indicates that a much larger proportion of the employees 60 years of age and over received higher salaries than was the case with employees in general. Thus, of the total number of employees, only 21.3 per cent received \$1,200 or more per annum, as compared with 38.9 per cent of the employees 60 years of age and over. Again, of the total male employees, only 21.8 per cent received \$1,200 or more per annum, while of the male employees 60 years of age and over, 39.4 per cent received such salaries. Likewise, of the total female employees, only 14.6 per cent received \$1,200 or more per annum, while 32.5 per cent of the females 60 years of age and over received salaries of that amount or more. The percentage of all employees

under 60 years of age receiving \$1,200 or more per annum is 19.8, and of the males and females 20.5 and 13.8, respectively.

The age of the employees is frequently associated with the character of the work on which they are engaged, but, as will be explained, the class of work as reported by the Executive Departments is only a general indication of the work on which the employees were actually engaged. Therefore the comparison of the ages of employees in the different occupation groups loses much of its significance, and this should not be lost sight of in an analysis of the following table, showing the number of employees in the District of Columbia and elsewhere, by sex and occupation, distributed by age periods:

TABLE 32.—MALE AND FEMALE EMPLOYEES CLASSIFIED ACCORDING TO AGE PERIODS, BY OCCUPATION GROUPS.

SEX AND OCCUPATION GROUP.	AGE PERIOD.

SALARY.

Rule XIII of the Civil Service Commission, promulgated May 29, 1899, provides that:

The officers and employees in all branches of the classified service of the United States, for the purposes of these rules, shall be arranged in the following classes, unless otherwise provided by law:

Class A. All persons receiving an annual salary of less than \$720, or a compensation at the rate of less than \$720 per annum.

Class B. All persons receiving an annual salary of \$720 or more, or a compensation at the rate of \$720 or more, but less than \$840 per annum.

Class C. All persons receiving an annual salary of \$840 or more, or a compensation at the rate of \$840 or more, but less than \$900 per annum.

Class D. All persons receiving an annual salary of \$900 or more, or a compensation at the rate of \$900 or more, but less than \$1,000 per annum.

Class E. All persons receiving an annual salary of \$1,000 or more, or a compensation at the rate of \$1,000 or more, but less than \$1,200 per annum.

Class 1. All persons receiving an annual salary of \$1,200 or more, or a compensation at the rate of \$1,200 or more, but less than \$1,400 per annum.

Class 2. All persons receiving an annual salary of \$1,400 or more, or a compensation at the rate of \$1,400 or more, but less than \$1,600 per annum.

Class 3. All persons receiving an annual salary of \$1,600 or more, or a compensation at the rate of \$1,600 or more, but less than \$1,800 per annum.

Class 4. All persons receiving an annual salary of \$1,800 or more, or a compensation at the rate of \$1,800 or more, but less than \$2,000 per annum.

Class 5. All persons receiving an annual salary of \$2,000 or more, or a compensation at the rate of \$2,000 or more, but less than \$2,500 per annum.

Class 6. All persons receiving an annual salary of \$2,500 or more, or a compensation at the rate of \$2,500 or more per annum.

Provided, That this classification shall not include persons appointed to an office by and with the advice and consent of the Senate, nor persons employed as mere laborers or workmen; but all positions whose occupants are designated as laborers or workmen, and who were prior to May 6, 1896, and on June 10, 1896, regularly assigned to work of the same grade as that performed by classified employees, shall be included within this classification. Hereafter no person who is appointed as a laborer or workman without examination under the civil service rules shall be assigned to work of the same grade as that performed by classified employees.

The statistics concerning salaries have been compiled, so far as possible, in conformity with the above rule. Tables 37 and 38 show the number of males and of females, respectively, for each salary, employed in each department, bureau, and independent office.

The salaries, as given in these tables, represent rates

and not earnings. In cases where employees were paid by the day, the daily wages were multiplied by the 313 working days to obtain the annual compensation; where employees were paid by the month, monthly rates were multiplied by 12; and in cases of hourly rates the annual compensation was determined by multiplying the rate by the number of hours worked per day in that branch of the service, and then multiplying the product by 313.

In many cases employees were paid at a high rate, and were employed only a short time during the year. For instance, in the Internal Revenue service there were a number of "storekeepers and gaugers" who were paid "not to exceed \$4 per day when employed." They were unassigned at the time this report was made, and were engaged in occupations outside the Government service. In other words, they were simply subject to assignment at a rate not to exceed \$4 per day when employed. Nevertheless, their salary was computed by multiplying the maximum daily pay by 313.

Table 33, which follows, shows the total number of employees and the number in the District of Columbia and elsewhere within stated limits of salary:

TABLE 33.—Number of employees in the District of Columbia and elsewhere in each salary group.

SALARY.	Total.	In the District of Columbia.	Elsewhere.

Smithsonian Institution	337	153	46	6	30	19	24	18	6	9	15	10	1		

These tables include the entire number, 150,383 employees, concerning whom information of some character was received; but there were 188 appointees whose salaries were not reported and 13,939 employees were reported as receiving no compensation. The latter were almost entirely substitute Rural Free Delivery carriers, who received compensation only for such times as they were called upon to perform their duties and, therefore, can not be assigned to any of the classified salary groups. The annual compensation was not shown for 1,587 employees engaged on piecework.

The total includes also 613 special agents paid on a per diem basis who received compensation only for such time as they were actually employed. With all these classes eliminated, there remain 134,056 persons for whom an annual salary or compensation at annual rates was reported or could be computed with a degree of accuracy. The statistics for these 134,056 employees are summarized in the following table so as to show the number and proportion within each specified salary limit employed in each of the 13 departments and independent offices:

¹ Exclusive of 15,714 employees, paid by the piece, serving without salary, or for whom salaries were not reported, and 613 special agents receiving a per diem salary.

² Less than one-tenth of 1 per cent.

The employees receiving less than \$720 per annum, being the greatest in number, will be taken up in detail to make clear the purpose of the table. Of the 50,047 employees reported within this salary limit, 33,057, or 66 per cent, were in the Post Office Department. This predominant number is due to the inclusion of substitute letter carriers, who are paid only a nominal salary unless actually employed. The department also has under its control more than two-thirds of the employees of the Executive Civil Service and therefore necessarily shows the largest percentage in the salary groups which contain the largest number of employees, viz, those receiving less than \$1,400 per annum. The next largest proportion for those receiving less than \$720 is for the

Treasury Department, where 6,228, or 12.4 per cent, of this class were employed. This department also contains the largest proportion of the employees receiving salaries of \$1,400 and over. It gave employment to 31.3 per cent of the group receiving \$1,400 but less than \$1,600, and a constantly increasing percentage for each of the higher groups until the percentage reached 43.1 of those receiving \$2,500 and over. Considering the two extremes of salary, less than \$720 and \$2,500 and over per annum, it appears that 78.4 per cent, or more than two-thirds of the persons receiving the former were employed in the Treasury and Post Office departments, while 66.4 per cent of those receiving the higher salary were em-

¹ Less than one-tenth of 1 per cent.

These tables assist in a detailed analysis of the personnel of each department, bureau, and independent office from the standpoint of compensation. Undue importance is apt to be attached to the large percentages shown for some of the salary groups, unless the number of employees involved is also considered. The totals for the Department of State, for which no bureaus or suboffices were reported, may be taken as an illustration of the importance of the tables. The total force of the department, as shown by the returns, consisted of 94 males and 19 females, and as the annual salary was reported for all of them, they are all included in the tables. No employees of the department received less

than \$720 per annum, all of the females received \$900 or over, while 18 of the males were rated at less than \$900. Of the females 16, or 84.2 per cent, received \$1,000 and over but less than \$1,400 per annum, while the 20 males reported for the same group of salaries constituted only 21.3 per cent of the total number of males in the department. No female received \$1,600 or more, but 36 males, or 38.3 per cent of the total number of males, are rated at that or a higher salary. None of the departments reported females for the salary group, \$2,000 but less than \$2,500.

Practically the entire force of some of the bureaus was reported under the same salary group. This was

the case in the Rural Free Delivery service of the Post Office Department, where all of the 15,900 employees were reported as receiving less than \$720 per annum.

It is interesting to compare the proportion of em-

ployees at each salary for certain branches of the service having about the same numerical force, and a comparison of this character is made in the following table for the male employees in six offices:

TABLE 39.—DISTRIBUTION OF MALE EMPLOYEES IN SPECIFIED DEPARTMENTS AND INDEPENDENT OFFICES, BY SALARY.

SALARY.	NUMBER.						PER CENT.					
	Post Office Department proper.	War Department proper.	Department of the Interior proper.	Department of Agriculture.	Revenue Cutter service.	Sub-treasuries.	Post Office Department proper.	War Department proper.	Department of the Interior proper.	Department of Agriculture.	Revenue Cutter service.	Sub-treasuries.

\$720 but less than \$840	101	132	227	493	35	85	8.3	9.2	7.3	14.8	14.8	11.9
\$840 but less than \$900	12	54	55	89	7	7	1.0	3.7	1.8	2.7	2.7	2.4
\$900 but less than \$1,000	97	90	243	271	6	13	8.0	6.3	7.8	8.2	2.3	4.4
\$1,000 but less than \$1,200	136	172	324	218	11	21	11.2	12.0	10.5	6.6	4.2	7.2
\$1,200 but less than \$1,400	231	414	560	439	16	62	19.0	28.9	18.8	13.2	6.1	21.2
\$1,400 but less than \$1,600	190	199	467	337	83	45	15.6	13.9	15.1	10.2	31.5	15.4
\$1,600 but less than \$1,800	194	128	259	83	16	16	15.9	8.9	8.4	2.5	8.4	5.4
\$1,800 but less than \$2,000	42	122	298	89	86	29	3.4	8.5	9.6	2.7	32.7	9.9
\$2,000 but less than \$2,500	79	83	248	87	84	34	6.5	2.3	8.0	2.6	2.6	1.6
\$2,500 and over	38	10	123	82	39	26	3.1	0.7	4.0	2.5	14.8	8.9

To be of the greatest significance this comparison should be between offices having not only the same number of employees, but those engaged in the same general line of work. It is impossible, however, to obtain such conditions, and the figures presented may be accepted as indicating only the extent of the variation in proportion of the employees receiving a given salary, irrespective of their occupations. To facilitate this comparison, the actual numbers and percentages have been placed in adjoining columns. Accepting the Post Office Department proper and the War Department proper as two branches of the service employing about the same number of persons, it appears that the proportion of males in the two departments receiving less than \$1,200 per annum is about the same, viz, 36.5 per cent for the Post Office Department and 36.8 per cent for the War Department. The agreement in the proportion of the employees at other salaries is not so marked. The employees of the Post Office Department receiving \$1,200 or more but less than \$1,400 constituted only 19 per cent of its force, as compared with 28.9 per cent of the force of the War Department at the same salary. On the other hand, the proportion of the employees in the Post Office Department receiving \$1,400 or more but less than \$1,800 was considerably in excess of the percentages for the same groups reported in the War Department. The War Department reported a larger proportion of its employees receiving \$1,800 or more but less than \$2,000; the Post Office Department a larger proportion receiving \$2,000 and more but less than \$2,500 and \$2,500 and over.

The following table makes a similar comparison between 4 offices divided into 2 groups, each member of a group containing about the same number of female employees:

TABLE 40.—Distribution of female employees in specified departments and bureaus, by salary.

SALARY.	NUMBER.				PER CENT.			
	Post Office Department.	Department of the Interior.	Mint and Assay service.	Pension agencies.	Post Office Department.	Department of the Interior.	Mint and Assay service.	Pension agencies.
Total	2,540	2,624	301	216	100.0	100.0	100.0	100.0
Less than \$720	1,242	1,361	226	36	48.9	51.8	75.1	16.6
\$720 but less than \$840	340	201	57	54	13.4	7.7	18.9	25.0
\$840 but less than \$900	5	84	49	49	0.2	3.2	16.3	22.7
\$900 but less than \$1,000	305	266	11	46	12.0	10.1	3.7	21.3
\$1,000 but less than \$1,200	361	183	4	24	14.2	7.0	1.3	11.1
\$1,200 but less than \$1,400	199	354	2	1	7.8	13.5	0.7	0.5
\$1,400 but less than \$1,600	61	145	1	3	2.4	5.5	0.3	1.4
\$1,600 but less than \$1,800	25	26	2	2	1.0	1.0	0.6	0.9
\$1,800 but less than \$2,000	2	2	1	1	0.1	0.1	0.3	0.5
\$2,000 but less than \$2,500								
\$2,500 and over		2				0.1		

The comparatively small number of female employees in the different departments limits the comparisons of the character that can be made with any degree of accuracy, but the Post Office and Interior departments reported about the same number of females, and it appears that 62.3 per cent of the females in the Post Office Department and 59.5 per cent of those in the Interior Department received less than \$840 per annum. The proportion of females in the Post Office Department receiving \$900 or more but less than \$1,200 per annum was considerably in excess of those in the Interior Department, while the Interior Department reported a larger proportion receiving \$1,200 or more but less than \$1,400 and \$1,400 or more but less than \$1,600 per annum.

Table 41, which follows, is based upon Table 59, pages 64 to 73. The latter table is a detailed presentation of the number of employees under each form of appointment classified for each salary group according to their terms of service, the employees located in the District of Columbia and those located elsewhere

TABLE 41.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO

This table is a detailed analysis of the employees of the Executive Civil Service, so far as their appointment, salary, and term of service are concerned. Term of service, as here used, includes the entire period of service prior to July 1, 1903. The service may have been continuous or intermittent.

To show the significance of the table, the appointees holding positions through competitive examination may be taken as an illustration. There were 78,159 employees of this class reported, 9,261, or 11.8 per cent, being located in the District of Columbia and 68,898, elsewhere. Of the employees in the District, the length of service was not reported for 7; 507 were employed on piecework and their annual salary could not be computed. These two classes, therefore, comprising 514 employees, may be eliminated from present consideration. Of the 11 salary groups the greatest concentration is shown in those in which employees received less than \$720, \$1,200 or more but less than \$1,400, and \$1,400 or more but less than \$1,600 per annum. The 5,337 employees in these 3 groups form 57.6 per cent of the total number of employees under appointment by competitive examination in the District. The largest single group, that in which salaries of \$1,200 or more but less than \$1,400 are paid, reported 2,199 employees. Of this number 203, or 9.2 per cent, had been in the service less than one year, while 1,117, or 50.8 per cent, had been in the service less than five years. Only 180, or 8.2 per cent, had been in the service from fifteen to nineteen years, and only 6, or three-tenths of 1 per cent, from thirty to thirty-nine years, the longest period of service for which any employees were reported at this salary. Elsewhere than in the District of Columbia, the largest groups are those that received less than \$720, \$720 or more but less than \$840, and \$1,000 or more but less than \$1,200, these 3 groups containing 50,837, or 73.8 per cent of the total number of employees outside of the District of Columbia under appointment by competitive examination. The largest number of employees is found in the lower salary groups, indicating a prevalence of lower rates than those paid the employees in the District of Columbia. In order to make a direct comparison with employees in the District of Columbia, the number in the salary group \$1,200 or more but less than \$1,400 can be used. It is found that the proportions in the service for each of the periods up to and including three years, are considerably less than the corresponding proportions for those in the District, and also that 1,314 employees, or 29.9 per cent, had been in the service for less than five years, as compared with 50.8 per cent in the District. There were 1,332 employees, or 30.3 per cent, reported as having been in the service ten years or more but less than fifteen years, as compared with 19.4 per cent in the District. The number in the service for fifteen years or more formed 11.2 per cent of the total, as compared with 9.6 per cent in the District.

The table indicates that for the employees receiving \$1,200 or more but less than \$1,400 the period of service of those located elsewhere, was considerably longer than of those in the District of Columbia. While this contrast is not so great in some of the other salary groups, nevertheless it prevails in most of them with the exception of the group of employees receiving less than \$720 per annum. Excluding this last-named group from consideration, 49 per cent of the employees in the District of Columbia, holding appointment by competitive examination, had been in the service for five years or longer, as compared with 56.8 per cent located elsewhere.

AVERAGE SALARY, AGE, AND PERIOD OF SERVICE.

As previously explained, the salaries reported do not indicate the actual amounts received by the employees during the year, and in this report, therefore, averages based upon them are misleading. But they represent the rates which employees were receiving on July 1, 1903, and accordingly the average salary can be used as an indication of the amounts per employee represented by the pay roll of the different departments on that date. Similarly the average period of service is liable to convey wrong impressions of actual conditions, unless it be remembered that the period of service does not represent continuous service. The average age, on the other hand, can be computed with a greater degree of accuracy than either of the other factors. The following table shows the average salary, average age, and average period of service of the employees in the District of Columbia, for each of the 13 departments and independent offices:

TABLE 42.—Average salary, age, and period of service of employees in each department and independent office in the District of Columbia.

DEPARTMENT OR INDEPENDENT OFFICE.	AVERAGE.		
	Annual salary.	Years of age.	Period of service.
Total.....	\$1,072	41	10
Department of State	1,363	44	13
Treasury Department	994	41	11
War Department	1,124	46	14
Department of Justice	1,535	41	9
Post Office Department	1,216	40	7
Navy Department	1,103	38	8
Department of the Interior	1,227	44	12
Department of Agriculture	928	37	6
Department of Commerce and Labor	1,139	39	5
Interstate Commerce Commission	1,291	42	10
Civil Service Commission	1,252	34	7
Government Printing Office	1,007	42	10
Smithsonian Institution	925	40	10

In this table employees whose salary was not reported and those employed on piecework, as well as the 613 special agents previously referred to as employed in the Bureau of the Census, were omitted in computing the average salary. The employees for whom the age was not reported were likewise omitted in computing the average age. In the same way employees for whom

length of service was not reported, were omitted in computing the average length of service. In order to ascertain the true significance of the average salary, age, or length of service, the number of employees reported for each factor should be consulted. It is because of the uncertainties attending averages of this character that they were computed for the employees in the District of Columbia only.

The average salary per employee was obtained by multiplying the various salary rates by the number of employees receiving the several rates and then dividing the sum of the resulting products by the aggregate number of employees reported. This method would give a correct and properly weighted average, provided the actual rate was used in the case of each employee, but all the tabulations for salary have been by groups rather than by actual rates. For instance, the large number of employees reported as receiving less than \$720 per annum represented a variety of actual rates of pay, but as the number at each rate was not separately reported, it became necessary to decide upon some salary rate to be used in making the calculation, and \$600 per annum was selected. Again, though some of those included in the group \$720 but less than \$840 received a rate other than \$720, yet the fact that the great majority of the group received that rate led to its adoption as the "flat rate" for the group for the purpose of calculation. The same practice was followed for each of the salary groups, the lower limit being taken as the fixed rate to be multiplied by the number of employees within the group.

The average annual salary ascertained in this manner for all employees in the District of Columbia amounted to \$1,072. The employees in the Department of Justice, appear to have received the largest average annual salary, \$1,535. The smallest average annual salary is reported for the Smithsonian Institution where, as shown by Table 44, 62 per cent of the employees are reported in the occupation group "subclerical and laborers."

The average age of the employees was computed by multiplying severally the different years of age by the number of employees reported as of those years, respectively, and then dividing the sum of the resulting products by the aggregate number of employees reported. This gives an average age of 41 years for all employees in the District of Columbia. In considering this average it must be remembered that the ages reported are as of the last birthday prior to July 1, 1903. There is a certain degree of uniformity in the average age for all the offices, the highest, 46 years, and the lowest, 34 years, being shown for the War Department and the Civil Service Commission, respectively.

The average period of service was computed by multiplying the number of employees at each year of service by the number of years, the aggregate of the

products being divided by the total number of employees for whom period of service was reported. The average period of service of all employees in the District of Columbia was 10 years. The War Department shows the greatest average period of service, 14 years, and the Department of Commerce and Labor shows the least, 5 years.

CHARACTER OF WORK.

The title or official designation of each employee, as reported by the Executive Departments, is supposed to indicate the class of work in which the employee was engaged on or about July 1, 1903. There were 1,692 different titles of occupations reported, but as it was deemed impracticable to show the statistics separately for all of these they were grouped into 98 classes, and these were in turn divided into 6 general groups. The occupations of the employees as given by the heads of the Executive Departments, together with the class and the general group to which each was assigned, are shown in the appendix.

There was apparently little uniformity in the practice followed by the different branches of the service in designating the occupations of employees. The reports indicate that, in the majority of instances, the name of the occupation was based on the salary attached to the work, as fixed by the law that authorized the position, rather than on the character of the work. For instance, only 4 stenographers were reported for the Department of Commerce and Labor, yet there were at least 38 persons employed on this class of work in the Bureau of the Census alone. The classification of stenographic work as clerical is in itself a proper one, but it must be borne in mind that where, as in Government offices, such a classification is frequently adopted, the number of stenographers reported in the totals can not be accepted as representing the total number of persons actually engaged in stenographic work. Again, many of the employees are engaged in two or more of the 98 classes of occupations, and their assignment to a particular class on July 1, 1903, must not be taken to indicate that they were engaged in that occupation during the entire year. These statistics can, therefore, be accepted only as a very general indication of the actual character of employment. By no means should they be regarded as indicating either the salaries that ought to be paid for the various kinds of work or the age at which, under normal conditions, one could engage with advantage in such occupations.

Tables 63 and 64 show in detail the number of male and of female employees, respectively, in the District of Columbia and elsewhere, for each of the 98 classes and 6 general occupation groups in 10-year age periods. The following table shows the number of males and of females, respectively, for each of the 6 general occupation groups in each department, bureau, and independent office:

The character of the work in the different departments necessarily controls the numbers in the different occupations, but excluding the "miscellaneous" group, all of the 13 departments and independent offices reported employees in all of the groups of occupations except the Department of State and the Civil Service Commission,

neither of which reported any employees in the group "professional, technical, and scientific." The groups "executive," "clerical," and "subclerical and laborers," include in each of these cases all but 1 of the employees. As it is very difficult to preserve a

clear distinction among the "clerical," "subclerical and laborers," and "professional, technical, and scientific" classes, it is probable that some of the classes of work being done in these two offices would have been classed in other departments as professional, technical, or scientific. The term "miscellaneous," under which 5,517 employees are grouped, throws no light upon the character of the work on which they were engaged and

may therefore be disregarded in considering the relative importance of the different occupations in the several departments.

The following table summarizes the totals given in the preceding table, so as to show the number and proportion of the employees in each of the 13 departments and independent offices who were assigned to each of the 6 occupation groups:

TABLE 44.—DISTRIBUTION, BY OCCUPATION GROUPS, OF EMPLOYEES IN EACH DEPARTMENT AND INDEPENDENT OFFICE.

¹ Less than one-tenth of 1 per cent.

The employees classed as "clerical" and "subclerical and laborers" formed more than 50 per cent of the force in each department and office, with the exception of the Department of Agriculture and the Government Printing Office. The relative numbers in the different occupation groups are not uniform throughout each department and office. For instance, the number of the executive class, which should include those employed entirely, or to some extent, in supervising the work of others, ranged from less than 1 to more than 12 persons for each 100 employees. The large proportion reported as holding executive positions in the Department of State is probably due to the fact that the employees in the diplomatic service were not included. In other words, the executive force was probably engaged in supervising a greater number of employees than is indicated by these statistics. The large proportions shown for the executive group in the Department of the Interior and in the Civil Service and Interstate Commerce commissions are also conspicuously exceptional, but the lack of any uniform practice in the designation of occupations makes it useless to speculate upon the explanation of such exceptions. The following table, based on the preceding table, shows the percentage of the total for each of the 6 occupation groups in each of the 13 departments and independent offices:

TABLE 45.—Per cent distribution of employees in each occupation group, by departments and independent offices.

¹ Less than one-tenth of 1 per cent.

This table indicates the extent to which the employees in the different occupation groups were concentrated in the different departments and independent offices. For instance, while the Post Office Department contained 59.7 per cent of all employees and 85.8 per cent of all clerical employees, it had on its rolls only 1.5 per cent of the professional, technical, and scientific, 11 per cent of the executive, and 1.9 per cent of the mechanical groups.

The largest proportions of the "professional, technical, and scientific" group were found in the departments of Agriculture, Commerce and Labor, and Interior. This group includes all special agents, and each of these departments had a number of such agents, receiving orders directly from Washington, but working in different sections of the country.

The largest proportion of the executive group was found in the Treasury and Interior departments, which together reported 61.8 per cent of the entire executive force.

The mechanical group was largely concentrated in the War Department and the Government Printing Office, these together giving employment to 70.8 per cent of the entire group.

Of the group subclerical and laborers, 58.3 per cent were found in the Treasury and War departments.

The following table shows the number and proportion of the employees reported for each of the 6 groups of occupations in the District of Columbia and elsewhere:

TABLE 46.—Number and per cent of employees in the District of Columbia and elsewhere in each occupation group.

OCCUPATION GROUP.	Total.	IN THE DISTRICT OF COLUMBIA.		ELSEWHERE.	
		Number.	Per cent.	Number.	Per cent.
Total	150,383	25,675	17.1	124,708	82.9
Clerical	102,431	8,877	8.7	93,554	91.3
Professional, technical, and scientific	6,689	3,919	58.6	2,770	41.4
Executive	1,677	558	33.3	1,119	66.7
Mechanical	7,181	2,948	41.1	4,233	58.9
Subclerical and laborers	26,888	8,266	30.7	18,622	69.3
Miscellaneous	5,517	1,107	20.1	4,410	79.9

The large number, 93,554, reported for the "clerical" group as employed elsewhere than in the District of Columbia reduces the proportion of the total number in the District, but, with the exception of this group, the proportion of each group employed in the District of Columbia was largely in excess of the 17.1 per cent shown for the total of all employees.

In connection with the percentages given in the above table, it is interesting to study the proportion which each occupation group formed of the total number of employees in the District of Columbia and elsewhere, respectively. These proportions are given in the following table:

TABLE 47.—Per cent distribution of the total number of employees in the District of Columbia and elsewhere, by occupation groups.

OCCUPATION GROUP.	Total.	PER CENT.	
		In the District of Columbia.	Elsewhere.
Total	100.0	100.0	100.0
Clerical	68.1	34.6	75.0
Professional, technical, and scientific	4.4	15.2	2.2
Executive	1.1	2.2	0.9
Mechanical	4.8	11.5	3.4
Subclerical and laborers	17.9	32.2	14.9
Miscellaneous	3.7	4.3	3.6

Though there is very little direct connection between the period of service and occupation, yet, in order to make a presentation of occupations in combination with all the other factors, the following table is given. This table shows the number of employees for each period of service in the District of Columbia and elsewhere, distributed according to the 6 general groups of occupations with the percentage at each group.

TABLE 48.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO OCCUPATION GROUPS, BY PERIOD OF SERVICE.

The largest number of employees is reported in the group less than one year. The next largest was for the period of from five to nine years, and of these 56.9 per cent are classed as "clerical," and 24.8 per cent, "sub-clerical and laborers," these two groups containing 81.7 per cent of the total for that period of service.

The statistics for the occupations and ages of employees are shown in detail in Tables 63 and 64. The following table presents the numbers and proportions in each 10-year age period for each of the 6 occupation groups:

TABLE 49.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO OCCUPATION GROUPS, BY AGE PERIODS.

This table can be accepted only as an indication of the proportion of employees in each occupation group at various ages, the age being taken as of the last birthday prior to July 1, 1903. It appears that 33.8 per cent of the employees classed as "clerical" were 40 years of age and over, as compared with 43.1 per cent of the "professional, technical, and scientific" group; 68 per cent of the "executive"; 49.1 per cent of the "mechanical"; 47.9 per cent of the "subclerical and laborers"; and 56 per cent of the "miscellaneous." In general, the executive force shows a larger percentage of employees for the higher periods of age and of service than does any other regular group. From Table 48 it appears that the proportion increases from two-tenths of 1 per cent for the period of less than one year to 10.6 per cent for the period of service from forty to forty-nine years. The distribution of this group according to age shows an increase from one-tenth of 1 per cent for those less than 20 years of age to 26.4 per cent for those 40 to 49 years and 16.4 per cent for those 60 to 69 years of age. As the services of the employees included in this group are largely of a

supervisory character, the number reported for the higher age periods is in conformity with conditions as they are known to exist.

Next to the "executive," the largest proportion at the higher age periods is shown for the "miscellaneous" group. The large number of inspectors in the Customs service reported for the higher ages is the principal reason for the large proportion at such ages shown for the entire group.

The employees classed as engaged in mechanical occupations are about evenly divided between those over and those under 40 years of age.

A considerable proportion of the clerical group is appointed through examination, the civil service rules fixing an age limit to such appointments. The small percentage at the higher age period is, therefore, in conformity with the conditions known to prevail in the majority of the departments.

The following table shows the number of employees in each 10-year age period, distributed by number and percentage according to occupation groups:

TABLE 50.—DISTRIBUTION OF EMPLOYEES CLASSIFIED ACCORDING TO OCCUPATION GROUPS, BY AGE PERIODS.

70 years and over.....	1,504	701	46.6	88	5.9	44	2.9	105	7.0	444	29.5	122	8.1

In the "clerical" group there appears to be a constant decrease in the proportion with the increase in age. Of the total number of employees under 20 years of age, 82 per cent are in this group, while only 46.6 per cent of those 70 years and over are classed as "clerical." On the other hand, there is a fairly constant increase in the proportion in each of the other groups with the advance in age. The increase was greatest in the group "subclerical and laborers," which had only 14.3

per cent of the employees under 20 years of age, but which reported 29.5 per cent of all the employees 70 years of age and over.

The number of males and females employed at stated salaries in the District of Columbia and elsewhere in each of the 98 classes of occupations are shown in Tables 72 and 73. The following table summarizes these statistics for the 6 occupation groups:

TABLE 51.—MALE AND FEMALE EMPLOYEES CLASSIFIED ACCORDING TO OCCUPATION GROUPS, BY SALARY GROUPS.

* Includes special agents appointed at \$5 per day when actually at work but who are not continuously employed.

(*) Less than one-tenth of 1 per cent.

Table 53 differs from Table 52 only by the omission from it of employees on piecework, employees without compensation, and those for whom no salary was reported, and also the special agents referred to elsewhere. The absolute numbers at each salary rate, excepting that of \$1,400 or more but less than \$1,600,

therefore stand as in Table 52, only percentages being affected by the omissions. The table makes a more correct presentation of the proportion of the total number in each occupation group receiving the indicated salaries.

¹ Less than one-tenth of 1 per cent.

It appears that only 17.9 per cent of the clerical group received \$1,200 or more per annum, as compared with 69.1 per cent for the professional, technical, and scientific group, 91.3 per cent for the executive, 39.2 per cent for the mechanical, and 50.1 per cent for the miscellaneous group. On the other hand only 7 per cent of the subclerical and laborers group received a salary of \$1,200 or more. Conversely, the proportion of the clerical group receiving less than \$1,200 is considerably greater than that of any of the other general groups of occupations, with the exception of the subclerical and laborers. In this connection, however, it should be remembered that the salaries reported indicate, in some instances, rates of pay rather than actual earnings. This has a tendency to increase the numbers and proportions at the higher salaries in the groups in which a number of per diem employees are reported, such as the professional, technical, and scientific, and the mechanical. Of the employees in the two groups, clerical and subclerical and laborers combined, 58.3 per cent received less than \$900 per annum, as compared with 29.5 per cent for the mechanical group. This difference is chiefly due to the fact that a relatively large number of the employees in the clerical and subclerical and laborers groups are females, as is shown by Tables 72 and 73.

The following table shows the percentage in each occupation group of those receiving the various stated salaries:

TABLE 54.—Per cent distribution of employees classified according to occupation groups, by salary groups.

¹ Less than one-tenth of 1 per cent.

BUREAU OF THE CENSUS.

The recent organization of this Bureau and the radical difference between its work and that of other offices make a separate presentation of the statistics interesting and desirable. The Bureau was organized as a permanent office and incorporated in the classified service on July 1, 1902.

On July 1, 1903, the force of the office consisted of 1,401 employees, all of whom in the previous tables and discussion have been considered as located in the District of Columbia. Almost one-half of the employees of the Bureau were special agents, and 613 of them were permanently located in the cotton producing counties of the Southern states. These agents were appointed at a compensation of \$5 per day when actually employed. Since their duties were confined to the collection of statistics concerning the quantity of cotton ginned up to certain dates during the ginning season, they were employed for a comparatively limited time during the year, and their actual average yearly compensation did not exceed \$200. The appointment, duties, and compensation of these agents were of such a peculiar character that they have been excluded from the tables following.

While some of the employees had been in the civil service for a number of years prior to the organization of the Bureau, under the act of March 3, 1899, the great majority of them then entered the service for the first time. The character of work of the employees as shown by the reports was clerical, but it was clerical work peculiar to the collection and compilation of original data on a large scale and finds its counterpart in no other branch of the Executive Civil Service.

Exclusive of the 613 special agents referred to, there were 788 employees in the Bureau on July 1, 1903. Of this number, 427, or 54.2 per cent, were males, and 361, or 45.8 per cent, were females. The native born employees numbered 765, or 97.1 per cent of the entire force, while the foreign born numbered 23, or 2.9 per cent. Of the males, 410 were natives and 17 were foreign born. Of the females, 355 were natives

and 6 were foreign born. The following table shows the total number of employees and the number of males and females, respectively, at each year of age:

TABLE 55.—*Males and females in the Bureau of the Census, classified according to years of age.*

41.....	28	14	14	72.....	1	1	1
42.....	16	9	6	73.....	1	1	1

The detailed statistics given in the above table are summarized in the following table so as to show the number and percentage of the total and of males and of females at each age period:

TABLE 56.—*Distribution of male and of female employees in the Bureau of the Census, by age periods.*

AGE PERIOD.	TOTAL.		MALES.		FEMALES.	
	Num-ber.	Per-cent.	Num-ber.	Per-cent.	Num-ber.	Per-cent.
Total.....	788	100.0	427	100.0	361	100.0
Less than 20 years.....	26	3.3	19	4.5	7	1.9
20 to 29 years.....	301	38.2	159	37.2	142	39.4
30 to 39 years.....	251	31.9	111	26.0	140	38.8
40 to 49 years.....	138	17.5	76	17.8	62	17.2
50 to 59 years.....	42	5.3	35	8.2	7	1.9
60 years and over.....	30	3.8	27	6.3	3	0.8

This statement shows that of the total number of persons employed in the Bureau on July 1, 1903, 73.4 per cent were less than 40 years of age. The proportion of the male employees at the age periods under 40 years was 67.7 per cent, which is considerably less than the proportion of such ages for the total; 80.1 per cent of the females were reported for these earlier ages. A comparison of these percentages with similar percentages for all employees in the classified service located in the District of Columbia, shows that the proportion of employees at the earlier periods of age was larger in the Bureau of the Census than in the rest of the service.

Of the total number in the classified service in the District of Columbia, 50.9 per cent were under 40 years of age, which is less than the proportion for the Bureau of the Census by 22.5 per cent. Of the total number of males in the classified service in the District of Columbia, 48 per cent were under 40 years of age, which is 19.7 per cent less than the proportion for the Bureau of the Census. Of the total number of females in the classified service in the District of Columbia, 58.8 per cent were under 40 years of age, which is 21.3 per cent less than the proportion for the Bureau of the Census.

The statistics relating to the salaries of the employees are summarized in the following table:

TABLE 57.—*Distribution of male and of female employees in the Bureau of the Census, by salary groups.*

SALARY.	TOTAL.		MALES.		FEMALES.	
	Num-ber.	Per-cent.	Num-ber.	Per-cent.	Num-ber.	Per-cent.
Total.....	788	100.0	427	100.0	361	100.0
Less than \$720.....	34	4.3	33	7.7	1	0.3

\$840 but less than \$900.....	9	1.1	8	1.9	1	0.3
\$900 but less than \$1,000.....	70	8.9	68	15.9	2	0.6
\$1,000 but less than \$1,200.....	281	35.7	273	64.0	8	2.2
\$1,200 but less than \$1,400.....	295	37.4	285	66.9	10	2.8
\$1,400 but less than \$1,600.....	81	10.3	78	18.3	3	0.8
\$1,600 but less than \$1,800.....	7	0.9	7	1.6	0	0.0
\$1,800 but less than \$2,000.....	14	1.8	14	3.3	0	0.0
\$2,000 but less than \$2,500.....	7	0.9	7	1.6	0	0.0
\$2,500 and over.....	7	0.9	7	1.6	0	0.0

This table shows that the greatest number—295, or 37.4 per cent—of the employees received \$1,200 or more but less than \$1,400 per annum. This class was composed entirely of clerks of Class 1; 235, or 55 per cent, of the males were reported for this group, as compared with 60, or 16.6 per cent, of the females. Of the total number of employees, 73.1 per cent received \$1,000 or more, but less than \$1,400 per year. These groups include 74.7 per cent of the males and 71.2 per cent of the females.

DATA PRESENTED IN THE DETAILED TABLES.

Character of appointment.—Shown separately for employees in the District of Columbia and those elsewhere in combination with years of service in Table 58, in combination with years of service and salary in Table 59, and in combination with age in Table 61; shown for employees in the District of Columbia, appointed through examination, classification, and preference, in combination with age and years of service in Table 60; shown separately for employees in the District of Columbia and those elsewhere, classified and unclassified, in combination with age and years of service in Table 65, with age and salary in Table 66, and with years of service, age, and salary in Table 67.

Sex.—Shown for each department, bureau, and independent office in the District of Columbia in combination with age in Table 62; shown separately for employees in the District of Columbia and those elsewhere in combination with occupation and age in Tables 63 and 64, and in combination with occupation and salary in Tables 72 and 73.

Years of service.—Shown separately for employees in the District of Columbia and those elsewhere in combination with character of appointment in Table 58, in combination with salary in Table 69, in combination with character of appointment and salary in Table 59, in combination with occupation groups in Table 70, and in combination with occupation groups and salary in Table 71; shown for employees in the District of Columbia appointed through examination, classification, and preference, in combination with age in Table 60; shown for all employees (exclusive of Presidential appointees) and for classified and unclassified employees in the District of Columbia and elsewhere, in combination with age in Table 65; shown separately for employees in the District of Columbia and those elsewhere, classified and unclassified, in combination with age and salary in Table 67; shown for each department, bureau, and independent office in Table 68.

Age.—Shown for all employees (exclusive of Presidential appointees) and for classified and unclassified employees in the District of Columbia and elsewhere, in combination with years of service in Table 65; shown separately for employees in the District of Columbia and those elsewhere in combination with character of appointment in Table 61; shown separately for employees (exclusive of Presidential appointees) in the District of Columbia and elsewhere, classified and un-

classified, in combination with salary in Table 66, and in combination with years of service and salary in Table 67; shown for employees in the District of Columbia appointed through examination, classification, and preference, in combination with years of service in Table 60; shown for employees in each department, bureau, and independent office in the District of Columbia in combination with sex in Table 62; shown by 10-year periods and in combination with occupation for male employees and female employees separately in the District of Columbia and elsewhere in Tables 63 and 64.

Salary.—Shown separately for employees (exclusive of Presidential appointees) in the District of Columbia and those elsewhere in combination with years of service in Table 69; shown separately for employees in the District of Columbia and those elsewhere in combination with character of appointment and years of service in Table 59, and in combination with occupation groups and service in Table 71; shown separately for employees (exclusive of Presidential appointees) in the District of Columbia and those elsewhere, classified and unclassified, in combination with age in Table 66, and in combination with years of service and age in Table 67; shown in combination with occupation for male employees and female employees separately in the District of Columbia and elsewhere in Tables 72 and 73.

Character of work.—Shown by occupations for male and female employees, respectively, in the District of Columbia and elsewhere in combination with age in Tables 63 and 64, and in combination with salary in Tables 72 and 73; shown by occupation groups for employees in the District of Columbia and elsewhere in combination with years of service in Table 70, and in combination with years of service and salary in Table 71.

Assistant chief of division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.	Assistant forewoman of sewing room.	Skilled laborers and workmen.	Subclerical and laborers.
Assistant chief packer...	Skilled laborers and workmen.	Subclerical and laborers.	Assistant gardener	Farmers	Subclerical and laborers.
Assistant civil engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Assistant gauger	Gaugers	Subclerical and laborers.
Assistant clothier and foreman of cutters.	Foremen	Subclerical and laborers.	Assistant general agent ..	Special agents, experts, appraisers, and commissioners.	Professional, technical, and scientific.
Assistant coin teller....	Cashiers and tellers	Clerical.	Assistant geologist	Geographers, geologists, and paleontologists.	Professional, technical, and scientific.
Assistant coiner	Technical employees, Mint and Assay service.	Professional, technical, and scientific.	Assistant horticulturist..	Botanists	Professional, technical, and scientific.
Assistant collector.....	Deputy collectors.....	Miscellaneous.	Assistant housekeeper...	Matrons	Subclerical and laborers.
Assistant commissioner of Indian affairs.	Heads of departments, branches of the service, and bureaus.	Executive.	Assistant hydrographer ..	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant cook	Cooks and bakers	Subclerical and laborers.	Assistant in charge, etc.	Foremen	Subclerical and laborers.
Assistant curator	Curators	Professional, technical, and scientific.	Assistant in charge of division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Assistant custodian.....	Custodians and miscellaneous keepers.	Subclerical and laborers.	Assistant in experimental firing.	Inspectors, work and materials.	Miscellaneous.
Assistant custodian janitor.	Custodians and miscellaneous keepers.	Subclerical and laborers.	Assistant in field	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant, dairy division.	Zoologists	Professional, technical, and scientific.	Assistant in historical work.	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant depot keeper..	Keepers, Light House service.	Subclerical and laborers.	Assistant in laboratory..	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant director	Chiefs of divisions, chief clerks, officers in charge.	Executive.	Assistant in pathology ..	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant director, etc...	Chiefs of divisions, chief clerks, officers in charge.	Executive.	Assistant in physiology..	Zoologists	Professional, technical, and scientific.
Assistant directress.....	Skilled laborers and workmen.	Subclerical and laborers.	Assistant in soil survey..	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant disciplinarian.	Teachers	Clerical.	Assistant in zoology.....	Zoologists	Professional, technical, and scientific.
Assistant doorkeeper....	Watchmen, detectives, doorkeepers, gate-men, and elevator conductors.	Subclerical and laborers.	Assistant inspector	Inspectors, live stock, meat, and dairy products; and veterinarians.	Professional, technical, and scientific.
Assistant draftsman.....	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Assistant inspector, granite.	Inspectors, work and materials.	Miscellaneous.
Assistant editor	Editors and compilers..	Clerical.	Assistant inspector of boilers.	Inspectors, steam vessels.	Professional, technical, and scientific.
Assistant electrical engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Assistant inspector of electric light plants.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Assistant electrician	Electricians and dynamo tenders.	Professional, technical, and scientific.	Assistant inspector of hulls.	Inspectors, steam vessels.	Professional, technical, and scientific.
Assistant electrotypist, etc.	Printing tradesmen	Mechanical.	Assistant inspector of ordnance.	Inspectors, work and materials.	Miscellaneous.
Assistant engineer	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Assistant irrigation engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Assistant engineer, second class.	Engineers, steam.....	Mechanical.	Assistant janitor	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.
Assistant entomologist ..	Zoologists	Professional, technical, and scientific.	Assistant keeper	Keepers, Light House service.	Subclerical and laborers.
Assistant expert.....	Scientific experts and investigators.	Professional, technical, and scientific.	Assistant law clerk.....	Law clerks	Clerical.
Assistant expert in steel.	Chemists and physicists.	Professional, technical, and scientific.	Assistant librarian	Librarians	Clerical.
Assistant farm steward..	Stewards and quartermasters.	Subclerical and laborers.	Assistant map mounter..	Skilled laborers and workmen.	Subclerical and laborers.
Assistant farmer.....	Farmers	Subclerical and laborers.	Assistant map printer...	Printing tradesmen	Mechanical.
Assistant farmer and dairyman.	Farmers	Subclerical and laborers.	Assistant matron.....	Matrons	Subclerical and laborers.
Assistant field matron...	Matrons	Subclerical and laborers.	Assistant melter.....	Melters, Mint and Assay service.	Executive.
Assistant foreman box-maker.	Foremen	Subclerical and laborers.	Assistant melter and refiner.	Melters, Mint and Assay service.	Executive.
Assistant foreman cartridge maker.	Foremen	Subclerical and laborers.	Assistant messenger....	Messengers	Subclerical and laborers.
Assistant foreman coining room.	Foremen	Subclerical and laborers.	Assistant messenger, Class B.	Messengers	Subclerical and laborers.
Assistant foreman fuse-maker.	Foremen	Subclerical and laborers.	Assistant microscopist...	Assistant microscopists.	Subclerical and laborers.
Assistant foreman melter.	Foremen	Subclerical and laborers.	Assistant mineral clerk..	Clerks	Clerical.
Assistant foreman of annealers.	Foremen	Subclerical and laborers.	Assistant observer.....	Observers, Weather Bureau.	Professional, technical, and scientific.
Assistant foreman of division.	Foremen	Subclerical and laborers.	Assistant pack master...	Laborers, unskilled ...	Subclerical and laborers.
Assistant foreman of packers.	Skilled laborers and workmen.	Subclerical and laborers.	Assistant packer	Skilled laborers and workmen.	Subclerical and laborers.
Assistant foreman of printing.	Foremen	Subclerical and laborers.	Assistant paleontologist.	Geographers, geologists, and paleontologists.	Professional, technical, and scientific.
Assistant foreman of refinery.	Foremen	Subclerical and laborers.	Assistant, pathological division.	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant foreman, packer and shipper.	Skilled laborers and workmen.	Subclerical and laborers.	Assistant pathologist....	Scientific experts and investigators.	Professional, technical, and scientific.
Assistant foreman packing-box maker.	Woodworkers	Mechanical.	Assistant pay roll clerk..	Bookkeepers, accountants, pay clerks, etc.	Clerical.
			Assistant paying teller..	Cashiers and tellers	Clerical.
			Assistant paymaster-general.	Commissioned officers.	Miscellaneous.
			Assistant pharmacist....	Pharmacists	Professional, technical, and scientific.
			Assistant photographer..	Photographers	Mechanical.
			Assistant physical geologist.	Geographers, geologists, and paleontologists.	Professional, technical, and scientific.
			Assistant physician	Physicians and surgeons.	Professional, technical, and scientific.
			Assistant plumber.....	Building tradesmen....	Mechanical.
			Assistant plumber and steamfitter.	Building tradesmen....	Mechanical.

Title or occupation, class, and group—Continued.

TITLE OR OCCUPATION.	Class.	Group.	TITLE OR OCCUPATION.	Class.	Group.
Assistant pomologist	Botanists	Professional, technical, and scientific.	Assistant waitress	Domestics and waiters.	Subclerical and laborers.
Assistant postmaster	Postmasters, assistant and fourth class.	Clerical.	Assistant warehouseman.	Laborers, unskilled.....	Subclerical and laborers.
Assistant printer	Printing tradesmen	Mechanical.	Assistant weigh clerk ...	Clerks	Clerical.
Assistant refrigerating engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Assistant weigher	Technical employees, Mint and Assay service.	Professional, technical, and scientific.
Assistant register	Clerks	Clerical.	Associate editor	Editors and compilers..	Clerical.
Assistant scale adjuster.	General mechanics.....	Mechanical.	Assorting teller.....	Cashiers and tellers....	Clerical.
Assistant seamstress.....	Skilled laborers and workmen.	Subclerical and laborers.	Attendant.....	Hospital attendants....	Subclerical and laborers.
Assistant secretary	Heads of departments, branches of the service, and bureaus.	Executive.	Attendant, pilot	Masters, mates, pilots, and captains.	Professional, technical, and scientific.

Carpenter, helper.....	Woodworkers.....	Mechanical.	Chief clerk in United States attorney's office.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Carpenter's machinist..	Metal workers.....	Mechanical.	Chief clerk, money order system.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Carriage driver.....	Laborers, unskilled....	Subclerical and laborers.	Chief clerk, Post Office Department.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Carrier.....	Carriers, mail.....	Clerical.	Chief clerk, first Assistant Postmaster-General.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cartman.....	Laborers, unskilled....	Subclerical and laborers.	Chief clerk, second Assistant Postmaster-General.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cartographic draftsman.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Chief clerk, third Assistant Postmaster-General.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Case hardener.....	Metal workers.....	Mechanical.	Chief clerk, fourth Assistant Postmaster-General.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cashier.....	Cashiers and tellers....	Clerical.	Chief clerk, United States Land Office.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cashier and chief clerk.	Chiefs of divisions, chief clerks, officers in charge.	Executive.	Chief, computing division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cashier's clerk.....	Clerks.....	Clerical.	Chief, consular bureau..	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cataloguer.....	Librarians.....	Clerical.	Chief, correspondence division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cement worker.....	Building tradesmen....	Mechanical.	Chief, cutter and trimmer.	Skilled laborers and workmen.	Subclerical and laborers.
Census clerk.....	Clerks.....	Clerical.	Chief, dairy division.....	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Cereal list.....	Botanists.....	Professional, technical, and scientific.	Chief deputy.....	Office deputy United States marshals.	Clerical.
Certificate clerk.....	Clerks.....	Clerical.	Chief, diplomatic bureau.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Chainman.....	Surveyors.....	Subclerical and laborers.	Chief disbursing clerk...	Bookkeepers, accountants, pay clerks, etc.	Clerical.
Chainman and acting inspector.	Surveyors.....	Subclerical and laborers.	Chief, division insular stations, etc.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Chairman, Creek appraisalment.	Special agents, experts, appraisers, and commissioners.	Professional, technical, and scientific.	Chief, division of soil management.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Chambermaid.....	Domestics and waiters..	Subclerical and laborers.	Chief, division of supplies.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Chaplain.....	Chaplains.....	Professional, technical, and scientific.	Chief, division of zoology, hygienic laboratory.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Charge, bindery warehouse.	Foremen.....	Subclerical and laborers.	Chief doorkeeper.	Watchmen, detectives, doorkeepers, gate-men, and elevator conductors.	Subclerical and laborers.
Charge, delivery clerk..	Clerks.....	Clerical.	Chief draftsman and claim clerk.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.
Charge of glue room....	Foremen.....	Subclerical and laborers.	Chief, drug laboratory...	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Charge of gold sweepers.	Foremen.....	Subclerical and laborers.	Chief, editorial division, etc.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Charge of numbering machine.	Foremen.....	Subclerical and laborers.	Chief electrical engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Charge of piece sewers..	Foremen.....	Subclerical and laborers.	Chief electrician.....	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Charge of sewing machines.	Foremen.....	Subclerical and laborers.	Chief engineer.....	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Charge of sewing machines, assistant.	Foremen.....	Subclerical and laborers.	Chief engineer and assistant superintendent.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Charge tailor shop.....	Foremen.....	Subclerical and laborers.	Chief engineer in charge of reclamation service.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Chart corrector.....	Clerks.....	Clerical.	Chief engineer, superintendent, etc.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Charwoman.....	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.	Chief engineering and drafting division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.
Chemical clerk.....	Chemists and physicists.	Professional, technical, and scientific.	Chief engraver.....	Engravers.....	Professional, technical, and scientific.
Chemical geologist.....	Geographers, geologists, and paleontologists.	Professional, technical, and scientific.	Chief engraver in charge.	Engravers.....	Professional, technical, and scientific.
Chemical microscopist, etc.	Chemists and physicists.	Professional, technical, and scientific.			
Chemist.....	Chemists and physicists.	Professional, technical, and scientific.			
Chemist and chief.....	Chemists and physicists.	Professional, technical, and scientific.			
Chemist and inkmaker.	Chemists and physicists.	Professional, technical, and scientific.			
Chief adjuster.....	Technical employees, Mint and Assay service.	Professional, technical, and scientific.			
Chief agent.....	Special agents, experts, appraisers, and commissioners.	Professional, technical, and scientific.			
Chief army cook.....	Cooks and bakers.....	Subclerical and laborers.			
Chief assistant to inspector.	Inspectors, work and materials.	Miscellaneous.			
Chief baker.....	Cooks and bakers.....	Subclerical and laborers.			
Chief, biochemic division.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, board of review...	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, bureau of accounts and disbursing clerk.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, bureau of appointments.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, bureau of indexes and archives.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, bureau of rolls and library.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief, bureau of trade relations.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief clerk.....	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief clerk, Adjutant-General's department.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief clerk, Adjutant-General's office.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			
Chief clerk and assistant in military parks and insular affairs.	Chiefs of divisions, chief clerks, officers in charge.	Executive.

Foreman blacksmith.	Foremen	Subclerical and laborers.	Glazier and painter.	Building tradesmen.	Mechanical.
Foreman bricklayer.	Foremen	Subclerical and laborers.	Gold boiler.	Melters, Mint and Assay service.	Executive.
Foreman, brushroom.	Foremen	Subclerical and laborers.			
Foreman, cabinet shop.	Foremen	Subclerical and laborers.			
Foreman, department melting room.	Foremen	Subclerical and laborers.			
Foreman, duplicating branch.	Foremen	Subclerical and laborers.			
Foreman, grounds.	Foremen	Subclerical and laborers.			
Foreman harnessmaker.	Foremen	Subclerical and laborers.			
Foreman laborer.	Foremen	Subclerical and laborers.			
Foreman molder.	Foremen	Subclerical and laborers.			
Foreman of adjusters.	Foremen	Subclerical and laborers.			
Foreman of annealers.	Foremen	Subclerical and laborers.			
Foreman of bindery.	Chiefs of divisions, chief clerks, officers in charge.	Executive.			

Title or occupation, class, and group—Continued.

TITLE OR OCCUPATION.	Class.	Group.	TITLE OR OCCUPATION.	Class.	Group.
Gold melter	Melters, Mint and Assay service.	Executive.	Inspector, Chinese bureau.	Inspectors, immigration, Chinese, sanitary, and school.	Miscellaneous.
Goldworker	Skilled laborers and workmen.	Subclerical and laborers.	Inspector, dairy exports.	Inspectors, live stock, meat, and dairy products; and veterinarians.	Professional, technical, and scientific.
Government actuary	Bookkeepers, accountants, pay clerks, etc.	Clerical.	Inspector, etc.	Inspectors, work and materials.	Miscellaneous.
Graduate nurse	Nurses.	Professional, technical, and scientific.	Inspector, garments	Inspectors, work and materials.	Miscellaneous.
Granulation melter	Melters, Mint and Assay service.	Executive.	Inspector-General	Commissioned officers.	Miscellaneous.
Grinder	Metal workers.	Mechanical.	Inspector in charge	Inspectors, post office.	Miscellaneous.
Guard	Guards	Subclerical and laborers.	Inspector of bags	Inspectors, work and materials.	Miscellaneous.
Guardian	Guards	Subclerical and laborers.	Inspector of boilers	Inspectors, steam vessels.	Professional, technical, and scientific.
Guardsmen	Messengers.	Subclerical and laborers.	Inspector of cloth	Inspectors, work and materials.	Miscellaneous.
Guide	Commissioned officers.	Miscellaneous.	Inspector of clothing and equipage.	Inspectors, work and materials.	Miscellaneous.
Gunner	Skilled laborers and workmen.	Subclerical and laborers.	Inspector of customs	Inspectors, Customs service.	Miscellaneous.
Hair spinner	Watchmen, detectives, doorkeepers, gate-men, and elevator conductors.	Subclerical and laborers.	Inspector of electric light plants.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Hallman	Watchmen, detectives, doorkeepers, gate-men, and elevator conductors.	Subclerical and laborers.	Inspector of electrical construction.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Handler and picker	Skilled laborers and workmen.	Subclerical and laborers.	Inspector of equipment.	Inspectors, work and materials.	Miscellaneous.
Hardener	Metal workers.	Mechanical.	Inspector of furniture	Inspectors, work and materials.	Miscellaneous.
Harness inspector	Inspectors, work and materials.	Miscellaneous.	Inspector of general merchandise.	Inspectors, work and materials.	Miscellaneous.
Harnessmaker	Leather workers.	Mechanical.	Inspector of headstones.	Inspectors, work and materials.	Miscellaneous.
Head charwoman	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.	Inspector of heating, hoisting, and ventilating apparatus.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Head cook	Cooks and bakers.	Subclerical and laborers.	Inspector of hulls	Inspectors, steam vessels.	Professional, technical, and scientific.
Head curator	Curators.	Professional, technical, and scientific.	Inspector of khaki material.	Inspectors, work and materials.	Miscellaneous.
Head farmer	Farmers.	Subclerical and laborers.	Inspector of locks	Inspectors, work and materials.	Miscellaneous.
Head gardener	Farmers.	Subclerical and laborers.	Inspector of materials	Inspectors, work and materials.	Miscellaneous.
Head keeper	Custodians and miscellaneous keepers.	Subclerical and laborers.	Inspector of mechanical and electrical engineering.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Head lockmaker	Metal workers.	Mechanical.	Inspector of plumbing	Inspectors, work and materials.	Miscellaneous.
Head pressman	Printing tradesmen.	Mechanical.	Inspector of repairs	Inspectors, work and materials.	Miscellaneous.
Heating and ventilating draftsman.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Inspector of supplies for the Army.	Inspectors, work and materials.	Miscellaneous.
Heating engineer	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Inspector of surveys, general and district land offices.	Special agents, experts, appraisers, and commissioners.	Professional, technical, and scientific.
Helper	Skilled laborers and workmen.	Subclerical and laborers.	Inspector of textile fabrics.	Inspectors, work and materials.	Miscellaneous.
Helper, department melting room.	Skilled laborers and workmen.	Subclerical and laborers.	Inspector of wool and textile fabrics.	Inspectors, work and materials.	Miscellaneous.
Helper in storeroom	Skilled laborers and workmen.	Subclerical and laborers.	Inspectress	Inspectors, Customs service.	Miscellaneous.
Helper in sweep cellar	Skilled laborers and workmen.	Subclerical and laborers.	Instructor, etc.	Industrial teachers.	Subclerical and laborers.
Herder	Laborers, unskilled.	Subclerical and laborers.	Instructor in blacksmithing.	Industrial teachers.	Subclerical and laborers.
Hoisting engineer	Engineers, steam.	Mechanical.	Instructor in carpentry.	Industrial teachers.	Subclerical and laborers.
Horticulturist	Botanists.	Professional, technical, and scientific.	Instructor in carriage-making.	Industrial teachers.	Subclerical and laborers.
Hospital apprentice	Apprentices.	Subclerical and laborers.	Instructor in harness-making.	Industrial teachers.	Subclerical and laborers.
Hospital attendant	Hospital attendants.	Subclerical and laborers.	Instructor in painting.	Industrial teachers.	Subclerical and laborers.
Hospital attendant, clerk.	Clerks.	Clerical.	Instructor in shoemaking.	Industrial teachers.	Subclerical and laborers.
Hospital cook	Cooks and bakers.	Subclerical and laborers.	Instructor in tailoring.	Industrial teachers.	Subclerical and laborers.
Hospital nurse	Nurses.	Professional, technical, and scientific.	Instructor in tin-smithing.	Industrial teachers.	Subclerical and laborers.
Hospital steward	Stewards and quarter-masters.	Subclerical and laborers.	Instrument man	Surveyors.	Subclerical and laborers.
Hostler	Laborers, unskilled.	Subclerical and laborers.	Instrument repairer	General mechanics.	Mechanical.
House corporal	Commissioned officers.	Miscellaneous.	Instrumentmaker	General mechanics.	Mechanical.
House steward	Stewards and quarter-masters.	Subclerical and laborers.	Interne	Internes.	Professional, technical, and scientific.
Housekeeper	Matrons.	Subclerical and laborers.	Interpreter	Interpreters.	Clerical.
Hydraulic pressman	General mechanics.	Mechanical.	Interpreter, etc.	Interpreters.	Clerical.
Hydrographer	Scientific experts and investigators.	Professional, technical, and scientific.	Investigator of dietaries.	Zoologists.	Professional, technical, and scientific.
Hydrographer and topographer.	Scientific experts and investigators.	Professional, technical, and scientific.	Ironer	Skilled laborers and workmen.	Subclerical and laborers.
Hydrographic aid	Scientific experts and investigators.	Professional, technical, and scientific.	Ironworker	Metal workers.	Mechanical.
Hydrographic draftsman.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Irrigation assistant	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Hydrographic engineer.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Irrigation engineer	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Illustrator	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Issue clerk	Clerks.	Clerical.
Immigrant inspector	Inspectors, immigration, Chinese, sanitary, and school.	Miscellaneous.	Janitor	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.
Immigrant inspector, etc.	Inspectors, immigration, Chinese, sanitary, and school.	Miscellaneous.	Janitor, fireman	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.
Imposer	Printing tradesmen.	Mechanical.	Janitress	Janitors, cleaners, scrubbers, charwomen, etc.	Subclerical and laborers.
In charge of carpenters.	Foremen.	Subclerical and laborers.	Japanese interpreter	Interpreters.	Clerical.
In charge of cleaners.	Foremen.	Subclerical and laborers.	Jeweler	Metal workers.	Mechanical.
In charge of counters.	Foremen.	Subclerical and laborers.			
In charge of helpers.	Foremen.	Subclerical and laborers.			
In charge of plates	Custodians and miscellaneous keepers.	Subclerical and laborers.			
In charge of sewers	Foremen.	Subclerical and laborers.			
In charge of stitching machines.	Foremen.	Subclerical and laborers.			
In charge of web press.	Foremen.	Subclerical and laborers.			
Index clerk	Librarians.	Clerical.			
Industrial teacher	Industrial teachers.	Subclerical and laborers.			
Inspector	Inspectors, Customs service.	Miscellaneous.

Junior engineer, surveyor.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Lockmaster.....	Foremen	Subclerical and laborers.
Junior engineer, transitman.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.	Locksmith and electrician.	General mechanics.....	Mechanical.
Junior lockfitter.....	General mechanics.....	Mechanical.	Locomotive engineer and machinist.	Metal workers.....	Mechanical.
Keeper.....	Keepers, Light House service.	Subclerical and laborers.	Lumberman.....	Woodworkers.....	Mechanical.
Keeper, buoy depot.....	Custodians and miscellaneous keepers.	Subclerical and laborers.	Machine designer.....	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Keeper in charge.....	Keepers, Light House service.	Subclerical and laborers.	Machine operator.....	General mechanics.....	Mechanical.
Keeper of cemetery.....	Custodians and miscellaneous keepers.	Subclerical and laborers.	Machinist.....	Metal workers.....	Mechanical.
Keeper of Spanish archives.	Custodians and miscellaneous keepers.	Subclerical and laborers.	Machinist-engineer.....	Metal workers.....	Mechanical.
Kindergartner.....	Teachers.....	Clerical.	Machinist's helper.....	Metal workers.....	Mechanical.
Kitchen help.....	Domestics and waiters.	Subclerical and laborers.	Magazine attendant.....	Custodians and miscellaneous keepers.	Subclerical and laborers.
Kitchen servant.....	Domestics and waiters.	Subclerical and laborers.	Magazine keeper.....	Custodians and miscellaneous keepers.	Subclerical and laborers.
Knife grinder.....	Metal workers.....	Mechanical.	Magnetic observer.....	Chemists and physicists	Professional, technical, and scientific.
Laboratorian.....	Scientific experts and investigators.	Professional, technical, and scientific.	Mail carrier.....	Carriers, mail.....	Clerical.
Laboratory assistant.....	Scientific experts and investigators.	Professional, technical, and scientific.	Mail messenger.....	Messengers.....	Subclerical and laborers.
Laboratory helper.....	Skilled laborers and workmen.	Subclerical and laborers.	Maker-up.....	Printing tradesmen	Mechanical.
Laborer.....	Laborers, unskilled.....	Subclerical and laborers.	Male laborer.....	Laborers, unskilled	Subclerical and laborers.
Laborer, acting keeper.	Laborers, unskilled.....	Subclerical and laborers.	Manual training teacher	Industrial teachers.....	Subclerical and laborers.
Laborer, apprentice.....	Apprentices.....	Subclerical and laborers.	Map draftsman.....	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.
Laborer, Class A.....	Laborers, unskilled.....	Subclerical and laborers.	Map mounter.....	Skilled laborers and workmen.	Subclerical and laborers.
Laborer, classified.....	Laborers, unskilled.....	Subclerical and laborers.	Map printer.....	Printing tradesmen	Mechanical.
Laborer, keeper.....	Laborers, unskilled.....	Subclerical and laborers.	Map printer's assistant..	Printing tradesmen	Mechanical.
Laborer, preservation of census records.	Laborers, unskilled.....	Subclerical and laborers.	Map reviser.....	Clerks.....	Clerical.
Lampist.....	Electricians and dynamo tenders.	Professional, technical, and scientific.	Marbler.....	Printing tradesmen	Mechanical.
Lampmaker.....	Skilled laborers and workmen.	Subclerical and laborers.	Marine engine and boiler draftsman.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.
Land Office clerk.....	Clerks.....	Clerical.	Marine engineer.....	Engineers, steam.....	Mechanical.
Land purchasing agent..	Special agents, experts, appraisers, and commissioners.	Professional, technical, and scientific.	Mason.....	Building tradesmen	Mechanical.
Landscape gardener.....	Farmers.....	Subclerical and laborers.	Master.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Laundress.....	Skilled laborers and workmen.	Subclerical and laborers.	Master and pilot.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Laundry help.....	Skilled laborers and workmen.	Subclerical and laborers.	Master armorer.....	Metal workers.....	Mechanical.
Laundry manager.....	Foremen.....	Subclerical and laborers.	Master-at-arms.....	Commissioned officers.	Miscellaneous.
Law and bond clerk.....	Law clerks.....	Clerical.	Master carpenter.....	Foremen.....	Subclerical and laborers.
Law clerk.....	Law clerks.....	Clerical.	Master harnessmaker.....	Foremen.....	Subclerical and laborers.
Law clerk and examiner of titles.	Law clerks.....	Clerical.	Master machinist.....	Foremen.....	Subclerical and laborers.
Law examiner.....	Law clerks.....	Clerical.	Master mechanic.....	Foremen.....	Subclerical and laborers.
Law librarian.....	Librarians.....	Clerical.	Master of boat.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Lawn hand.....	Laborers, unskilled.....	Subclerical and laborers.	Master of dredge.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Lawyer.....	Attorneys.....	Professional, technical, and scientific.	Master of launch.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Leading ship draftsman.	Draftsmen, artists, illustrators, etc.	Professional, technical, and scientific.	Master of steamer.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Leadingman.....	Foremen.....	Subclerical and laborers.	Master of vessel.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Leadsman.....	Surveyors.....	Subclerical and laborers.	Master painter.....	Foremen.....	Subclerical and laborers.
Leasing clerk.....	Clerks.....	Clerical.	Master plumber.....	Foremen.....	Subclerical and laborers.
Leather cutter.....	Leather workers.....	Mechanical.	Master, steamboat.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Leather parer.....	Leather workers.....	Mechanical.	Mate.....	Masters, mates, pilots, and captains.	Professional, technical, and scientific.
Leather worker.....	Leather workers.....	Mechanical.	Matron and seamstress..	Matrons.....	Subclerical and laborers.
Level rod man and acting inspector.	Surveyors.....	Subclerical and laborers.	Matron and typewriter.	Matrons.....	Subclerical and laborers.
Leveler.....	Surveyors and levelers.	Professional, technical, and scientific.	Meat inspector.....	Inspectors, live stock, meat, and dairy products; and veterinarians.	Professional, technical, and scientific.
Levelman.....	Surveyors.....	Subclerical and laborers.	Mechanic.....	General mechanics.....	Mechanical.
Librarian.....	Librarians.....	Clerical.	Mechanic and builder.....	General mechanics.....	Mechanical.
Librarian climatologist..	Librarians.....	Clerical.	Mechanical engineer and draftsman.	Engineers, civil, mechanical, and electrical.	Professional, technical, and scientific.
Library assistant.....	Librarians.....	Clerical.	Mechanic's helper.....	General mechanics.....	Mechanical.
Lieutenant of the watch.	Watchmen, detectives, doorkeepers, gate-men, and elevator conductors.	Subclerical and laborers.	Medal clerk.....	Clerks.....	Clerical.
Lieutenant, Revenue Cutter service and assistant inspector, Life Saving service.	Commissioned officers..	Miscellaneous.	Medallist.....	Metal workers.....	Mechanical.
Light tender.....	Keepers, Light House service.	Subclerical and laborers.	Medical director.....	Commissioned officers.	Miscellaneous.
Lightkeeper.....	Keepers, Light House service.	Subclerical and laborers.	Medical examiner.....	Physicians and surgeons.	Professional, technical, and scientific.
Lineman.....	Skilled laborers and workmen.	Subclerical and laborers.	Medical inspector.....	Physicians and surgeons.	Professional, technical, and scientific.
Lithographer.....	Lithographers.....	Mechanical.	Medical interne.....	Internes.....	Professional, technical, and scientific.
			Medical referee.....	Physicians and surgeons.	Professional, technical, and scientific.
			Melter.....	Melters, Mint and Assay service.	Executive.
			Melter and refiner.....	Melters, Mint and Assay service.	Executive.
			Member of the Board of Pension Appeals.	Members of Board of Pension Appeals.	Professional, technical, and scientific.
			Memorandum clerk.....	Clerks.....	Clerical.
			Mess attendant.....	Domestics and waiters..	Subclerical and laborers.
			Mess boy.....	Domestics and waiters..	Subclerical and laborers.
